Microsoft Security certifications

Help advance your career, earn recognition, and validate your technical knowledge and abilities in current and future industry job roles with Microsoft Security certifications. Visit the [certifications page](#) to get started.

Microsoft Certified Security, Compliance, and Identity Fundamentals
Whether you're a business stakeholder, new or existing IT professional, or a student who has an interest in Microsoft security, compliance, and identity (SCI) solutions, this certification can help you familiarize yourself with the fundamentals of SCI across cloud-based and related Microsoft services.

Microsoft Certified Azure Security Engineer Associate
Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Microsoft 365 Certified Security Administrator Associate
Microsoft 365 Security Administrators proactively secure Microsoft 365 enterprise and hybrid environments, implement and manage security and compliance solutions, respond to threats, and enforce data governance.

Master the basics Grow in your role Advance your expertise

Microsoft Certified Cybersecurity Architect Expert
Cybersecurity architects are essential for helping organizations design and evolve their cybersecurity strategy to help protect a company's mission and business processes across all aspects of their enterprise architecture.

Microsoft Certified Security Operations Analyst Associate
The Microsoft Security Operations Analyst collaborates with organizational stakeholders to secure information technology systems for the organization. Their goal is to reduce organizational risk by rapidly remediating active attacks in the environment, advising on improvements to threat protection practices, and referring violations of organizational policies to appropriate stakeholders.

Microsoft Certified Identity and Access Administrator Associate
The Identity and Access Administrator may be a single individual or a member of a larger team. This role collaborates with many other roles in the organization to drive strategic identity projects to modernize identity solutions, to implement hybrid identity solutions, and to implement identity governance.

Microsoft Certified Information Protection Administrator Associate
The Information Protection Administrator defines applicable requirements and tests IT processes and operations against those policies and controls. They are responsible for creating policies and rules for content classification, data loss prevention, governance, and protection.

Microsoft Security, Compliance, and Identity certifications

Drive success with certifications

Open doors to new career possibilities. Choose the certification that's right for you, based on the recommended skills, knowledge, and experience for each exam.

Security, Compliance, and Identity Fundamentals Exam SC-900	Azure Security Engineer Associate Exam AZ-500	Microsoft 365 Security Administrator Associate Exam MS-500
