ASSIGNMENT THREE

Welcome to the Zoo

Warning

You are about to handle live malware and if you are unsure how to safely handle malware, please conduct research prior to continuing.

1. Visit the Live Malware Repository at <https://github.com/ytisf/theZoo>
2. Upload malware samples to Virus Total at <https://www.virustotal.com/gui/home/upload>
3. Calculate the file hash of malware samples and search Virus Total for it at <https://www.virustotal.com/gui/home/search>
4. Execute the sample interactively in a sandbox (any of them will work but I enjoy <https://app.any.run> or <https://hybrid-analysis.com>)
5. Compile a list of Indicators of Compromise (IoCs) from the malware execution and search google for them.
