

1) What are basic characteristics of cloud computing? (O)

- A. On-demand self-service
- B. broad network access methods
- C. Resource pooling
- D. fast and scalable
- E. Measurable services

2) Which of the following is generally used to provide application development and running environments?

- A. IaaS
- B. PaaS
- C. SaaS

3) Pain Points of Current Enterprise IT Infrastructure includes:

- A. Slow Business Launch
- B. Complicated Lifecycle Management
- C. High TCO
- D. I/O Bottleneck

4) Which of the following are deployment models of cloud computing?

- A. Public cloud
- B. Private cloud
- C. Hybrid cloud
- D. Community/Industry cloud

5) The development of Cloud Computing includes:

- A. Virtualization
- B. Private Cloud
- C. Public Cloud
- D. Hybrid Cloud

6) What is Huawei Cloud Positioning?

- A. Focus on IaaS
- B. Enable PaaS
- C. Converge SaaS

- 7) Which of the Following Compute Services Does HUAWEI CLOUD Provide? (O)
- A. Elastic Cloud Server (ECS)
  - B. Auto Scaling (AS)
  - C. Image Management Service (IMS)
  - D. Elastic Volume Service (EVS)

- 8) Which are part of HUAWEI CLOUD ecosystem?
- A. Huawei Cloud Marketplace
  - B. Huawei Cloud Academy
  - C. Partners
  - D. Developers

- 9) Which belongs to Huawei Cloud Developer Center Ecosystem Catalog?
- A. Developer Contest
  - B. Cloud Expert
  - C. Sign-Up Platform
  - D. MVP
  - E. Student Innovation and Entrepreneurship Program
  - F. Yunzhi Club

- 10) How many types of login users does HUAWEI CLOUD support?
- A. 1
  - B. 2
  - C. 3
  - D. 4

- 11) Which of the following service is used by an ECS to store data? (O)
- A. AS
  - B. IMS
  - C. EVS
  - D. DeC

- 12) Which of the following are ECS types? (O)
- A. General computing (General Computing, General Computing Plus)
  - B. Memory-optimized (Memory Optimized, Large Memory)
  - C. High Performance Computing (High & Ultra High Performance Computing)

- D. Big Data (Ultra High I/O, Disk Intensive)
- E. Computing-accelerated (GPU Accelerated, FPGA High Performance)

- 13) ECSs can be charged in yearly/monthly or metered mode (pay per use).
- A. True
  - B. False

- 14) Is an ECS a physical server?
- A. Yes
  - B. No

- 15) All OSs support key-authenticated ECS logins.
- A. True
  - B. False

- 16) Which of the following policies does AS support?
- A. Scheduled policy
  - B. Periodic policy
  - C. Alarm policy
  - D. Random policy

- 17) Which is not an action of Bandwidth scaling policy?
- A. Reduce
  - B. Double
  - C. Set to
  - D. Add

- 18) What is used by an ECS to store data?
- A. Auto Scaling
  - B. Elastic Volume Service
  - C. Cloud Container Engine
  - D. Cloud Eye

- 19) Auto Scaling (AS) is charged.
- A. True
  - B. False

- 20) AS supports the following instance removal policies:
- A. Oldest instances created based on the oldest configuration
  - B. Newest instances created based on the oldest configuration
  - C. Oldest instances
  - D. Newest instances

- 21) AS can work with Elastic Load Balance (ELB), which automatically distributes access traffic across ECS instances in the AS group through the listener, improving system availability.
- A. True
  - B. False

- 22) Alarm policies support system monitoring and custom monitoring.
- A. True
  - B. False

- 23) An instance added to an AS group by an AS policy cannot be manually removed from the group.
- A. True
  - B. False

- 24) AS can automatically adjust ECS and bandwidth resources.
- A. True
  - B. False

25) Which of the following policies can be configured to increase the number of instances in an AS group at a predetermined time each week?

- A. Alarm policy
- B. Scheduled policy
- C. Periodic policy
- D. All of the above

26) Which of the following statements about AS is incorrect?

- A. AS can automatically adjust the number of instances in an AS group based on preset policies.
- B. AS can perform health checks on instances in an AS group.
- C. Instance protection can be enabled on specified instances in an AS group.
- D. AS does not allow users to view the status of instances in an AS group.

27) Which of the following statements about scaling actions is incorrect?

- A. When the number of instances in an AS group is not the same as expected, a scaling action is triggered.
- B. After an AS group is disabled, changing the number of expected instances triggers a scaling action.
- C. When a trigger condition of an AS policy is met, a scaling action is triggered automatically.
- D. Lifecycle hooks help users better manage scaling actions.

28) Which of the following statements about AS configuration is correct?

- A. An AS configuration defines the specifications of ECSs to be added to an AS group.
- B. An AS configuration that has been created can be modified as needed.
- C. After an AS group is enabled, its AS configuration cannot be changed.
- D. An unlimited number of AS configurations can be created.

29) How many types of policies does AS support?

- A. 0
- B. 1
- C. 2
- D. 3

30) Which of the following policies are supported by AS?

- A. Alarm policy

- B. Scheduled policy
- C. Periodic Policy
- D. Random policy

30

31) How can instances be added to an AS group?

- A. By an AS policy
- B. Manually
- C. By a change to the number of expected instances
- D. By AS configuration

32

32) Which of the following monitoring metrics are supported by the alarm policy?

- A. CPU Usage
- B. Network Inbound/Outbound Rate
- C. Disk Read/Write Requests
- D. Memory Usage
- E. Custom monitoring metrics
- F. GPU Usage/GPU Memory Usage
- G. EVS Disk Usage/EVS Disk I/O Read/Write
- H. Performance Status

33

33) Which operations can be performed on an AS policy?

- A. Manually Execute an AS Policy
- B. Modify
- C. Enable
- D. Create/Delete
- E. Disable

34

34) Which of the following services are associated with AS?

- A. Cloud Eye
- B. Virtual Private Cloud (VPC)
- C. Elastic Load Balance (ELB)
- D. Elastic Cloud Server (ECS)

35

35) Which operations are required to use ECS to create a Windows image?

- A. Configure the Windows ECS.
- B. Install Cloudbase-Init.
- C. Create a Windows private image.

D. Query and cleanup network rule files.

35

36) What is the type of the image converted based on an existing ECS?

- A. Public image
- B. Private image
- C. Shared image
- D. EulerOS image

37

37) Which of the following components are included in an ECS?

- A. vCPUs
- B. Memory
- C. Image
- D. EVS disk

38

38) Before creating a data disk image from a data disk, ensure that the ECS has a system disk and the data disk is not empty.

- A. True
- B. False

39

39) What image types does IMS support?

- A. Public image
- B. Private image
- C. Encrypted image
- D. Shared image

40

40) Private images can be classified into:

- A. System disk image
- B. Data disk image
- C. Full-ECS image
- D. Snapshot

41

41) If the ECS uses a static IP address, configure DHCP for the ECS, allowing it to dynamically obtain an IP address.

- A. True
- B. False

42) When creating image Cloudbase-init should be installed on OS to ensure that configuration of newly created ECSs from the image can be customized.

- A. True
- B. False

43) Image creation fails if entered System disk capacity is less than System disk capacity of external image file.

- A. True
- B. False

44) Use to Create Private Image (single Choice)

Full ECS Image using ECS

System Disk using ECS

System Disk using OBS File-my answer

System Disk using external Image

45) EVS provides the scalable, virtual block storage service, and the backend of EVS is based on a distributed architecture.

- A. True
- B. False

46) VBD EVS disks support only basic SCSI read/write commands.

- A. True
- B. False

47) Which of the followings are EVS disk types does ECS support?

- A. Ultra-high I/O
- B. High I/O
- C. Common I/O
- D. Latency optimized ultra-high I/O

48) How many servers can a shared EVS disk be attached to at most?

- A. 5
- B. 7
- C. 8
- D. 16

49) EVS can be attached to:

- A. OBS
- B. ECS
- C. BMS
- D. VPC

50) An EVS disk can be backed up only when it is in the ( ) state.

- A. Available
- B. In-use
- C. Error
- D. Deletion failed

51) Does VBS Support Cross-Region Backup and Restoration?

- A. True
- B. False

52) HUAWEI CLOUD provides Cloud Server Backup Service (CSBS) and Volume Backup Service (VBS) to protect your data against:

- A. viruses
- B. unintentional deletions
- C. software faults
- D. hardware faults

53) VBS does not support backing up EVS disks in batches.

- A. True
- B. False

54) On which of the following services does VBS depend?

- A. Elastic Cloud Server
- B. Elastic Volume Service
- C. Object Storage Service
- D. Image Management Service

55) ( ) records operations of VBS resources, facilitating query, audit, and backtracking

- A. Cloud Trace Service
- B. Cloud Eye
- C. Elastic Volume Service
- D. Object Storage Service.

56) VBS backs up EVS disks and uses the backups to restore original EVS disks, protecting user data accuracy and security.

- A. True
- B. False

57) VBS provides the data backup function for EVS disks. The created data backups can be used to create EVS disks.

- A. True
- B. False

58) Which of the following are OBS application scenarios?

- A. Massive storage resource pool
- B. Static web hosting
- C. Big data storage
- D. Backup
- E. Archiving

59) Which of the following methods or tools can be used to access OBS? (O)

- A. OBS Console
- B. OBS Browser
- C. obscmd
- D. APIs and SDKs

- 60) Access requests to OBS can be controlled by,
- A. ACLs
  - B. Bucket policies
  - C. User signature authentication
  - D. Server-side encryption

■

- 61) What is the data durability of OBS?
- A. 10 nines (99.99999999%)
  - B. 11 nines (99.999999999%)
  - C. 12 nines (99.9999999999%)

■

- 62) What is the basic storage unit in OBS?
- A. File
  - B. Block
  - C. Object
  - D. Bucket

■

- 63) Which of the following operations on buckets is not available in OBS?
- A. Creation
  - B. Formatting
  - C. Modification
  - D. Deletion

■

- 64) If you download an object of the Standard storage class through a HUAWEI CLOUD ECS server, which one of the following items is billed?
- A. Traffic
  - B. Request
  - C. Data restoration
  - D. Storage capacity

■

- 65) If you download an object of the Archive storage class to your local computer over the Internet, which one of the following items is billed?
- A. Traffic
  - B. Request
  - C. Data restoration

D. Traffic+Request+Data restoration

66) If a customer has some data to store and the data will be downloaded for only 10 times in a year, which of the following storage class is recommended?

- A. Standard storage class
- B. Infrequent Access storage class
- C. Archive storage class
- D. Block storage

67) Which of the following statements about the data in the Archive storage class is correct?

- A. Data in the Archive storage class can be directly downloaded by calling the API.
- B. Data in the Archived storage class can be accessed directly.
- C. If you want to access data in the Archive storage class, you need to restore the data first. Restored data is in the Standard storage class.
- D. If you want to access data in the Archive storage class, you need to restore the data first. Restored data is in the Infrequent Access storage class.

68) Which of the following statements about lifecycle rules is correct?

- A. Lifecycle rules support transition between storage classes by hour.
- B. Lifecycle rules for objects of historical versions take effect only when versioning is enabled for the bucket.
- C. Lifecycle rules for objects of historical versions cannot be configured if versioning is not enabled for the bucket.

69) Which of the following items cannot be configured when creating a bucket?

- A. Region where bucket resides
- B. Storage class of a bucket
- C. Bucket policy
- D. Static website hosting

70) Which of the following items cannot be configured when uploading an object?

- A. File path
- B. Storage class of the object
- C. KMS encryption
- D. File size

71) Which storage classes does OBS offer?

- A. Archive storage class
- B. Backup storage class
- C. Infrequent Access storage class
- D. Standard storage class

72) Which of the following are the application scenarios of SFS?

- A. Media processing
- B. Log management
- C. Content management and web directories
- D. High-performance computing (HPC)

73) SFS is charged in pay-per-use or monthly/yearly flat fee mode.

- A. True
- B. False

74) SFS includes the SFS and SFS Turbo products.

- A. True
- B. False

75) SFS supports the EXT4 and NTFS protocols.

- A. True
- B. False

76) SFS can be connected to the AD domain controller for permission control.

- A. True
- B. False

77) SFS (Capacity Oriented) allows ECSs in different VPCs to access the same file system.  
A. True  
B. False

78) What is the maximum size of a single file supported by SFS Capacity Oriented?  
A. 32 TB  
B. 64 TB  
C. 128 TB  
D. 240 TB

79) What is the maximum size of a single file supported by SFS Turbo?  
A. 16 TB  
B. 32 TB  
C. 64 TB  
D. 128 TB

80) SFS (Turbo) allows ECSs in different VPCs to access the same file system.  
A. True  
B. False

81) What is the maximum bandwidth supported by SFS?  
A. 2 GB/s  
B. 5 GB/s  
C. 10 GB/s  
D. 20 GB/s

82) What is the maximum bandwidth supported by SFS Turbo?  
A. 150 MB/s for Turbo Standard  
B. 350 MB/s for Turbo Performance  
C. 150 GB/s for Turbo Standard  
D. 350 GB/s for Turbo Performance

83) Which of the following file protocol is supported by SFS Turbo?

- A. NFS v3
- B. NFS v4
- C. SMB 2.0/2.1/3.0
- D. EXT4

84) What is the minimum latency of SFS Turbo Performance?

- A. 10 ms
- B. 5 ms
- C. 2 ms
- D. 1 ms

85) What is the minimum latency of SFS Turbo Standard?

- A. 10 ms
- B. 5 ms
- C. 2 ms
- D. 1 ms

86) What is the minimum latency of SFS?

- A. 20 ms
- B. 3 ms
- C. 2 ms
- D. 1 ms

87) What is the maximum IOPS supported by SFS Turbo?

- A. 5,000
- B. 10,000
- C. 20,000
- D. 30,000

88) Which of the following protocols are supported by SFS?

- A. NFS v3
- B. NFS v4
- C. FTP

D. EXT4

89) Which of the following are mainstream storage types in the industry?

- A. Block storage
- B. File storage
- C. Object storage
- D. Backup storage

90) Which of the following are HUAWEI CLOUD file storage services?

- A. SFS
- B. SFS Turbo
- C. SFS Plus
- D. All of the above

91) Which scenarios does SFS suit?

- A. HPC
- B. Media
- C. File sharing
- D. Game

92) Which scenarios does SFS Turbo suit?

- A. HPC
- B. Media
- C. High-performance websites
- D. Software development

93) An AZ contains one or multiple physical data centers. It has independent cooling, fire extinguishing, moisture-proof, and electricity facilities. Within an AZ, computing, network, storage, and other resources are logically divided into multiple clusters.

- A. True
- B. False

94) Of HuaweiCloud's service list page, which of the following service does NOT belong to the Computing category?

- A. ECS
- B. BMS
- C. IMS
- D. SFS

95) GPU-optimized ECSs can be applied to the following scenarios: cloud-based desktops, graphics rendering and engineering drawing run in virtualization environment.

- A. True
- B. False

96) Which of the following are the advantages of the VPC service?

- A. Secure & Reliable
- B. Flexible Configuration
- C. High Speed Access/Dynamic BGP
- D. Interconnection between VPCs

97) Which of the following operation incurs charges?

- A. Create an EIP
- B. Create a subnet
- C. Create a VPC
- D. Create a security group

98) The Virtual Private Cloud (VPC) service enables you to provision logically isolated, configurable, and manageable virtual networks, improving the cloud resource security and simplifying network deployment.

- A. True
- B. False

99) Which of the Following Functions Are Provided by HUAWEI CLOUD VPC?

- A. Customizing CIDR blocks
- B. Customizing access control policies
- C. Accessing the Internet using EIPs
- D. Connecting a local data center using a VPN or Direct Connect connection

100) Which of the Following CIDR blocks care available for VPC Service?

- A. 10.0.0.0/8
- B. 172.16.0.0/16
- C. 192.168.0.0/16

101) Which of the following cannot be configured in a VPC?

- A. Subnet
- B. Security group
- C. Elastic IP address
- D. Bandwidth
- E. Load balancing

102) To enable RDP access to a created Windows ECS, which port must be opened by an inbound security group rule?

- A. 37
- B. 53
- C. 3389
- D. 80

103) Which of the following must be configured to enable an ECS without a bound EIP to access the Internet through an ECS with a bound EIP?

- A. Route table
- B. Shared bandwidth
- C. Load balancing

104) How many network interface cards (NICs) does an ECS functioning as a SNAT server require?

- A. 1
- B. 2
- C. 3

105) Which of the following correctly describes the default security group rule?

- A. All outbound traffic is allowed, and ECSs associated with the same security group can access each other.
- B. All inbound traffic is allowed, and ECSs associated with the same security group can access each other.

C. All outbound traffic is allowed, and ECSs associated with the same security group cannot access each other.

D. All inbound traffic is allowed, and ECSs associated with the same security group cannot access each other.

**A**

106) Which of the following can enable an ECS in a VPC to communicate with a host in a private data center?

- A. Internet connection
- B. VPN
- C. VPC peering connection

**B**

107) Which of the following is optional when you create a subnet?

- A. Name
- B. CIDR block
- C. Gateway
- D. Tag

**B**

108) If you have high requirements on network stability and availability, which of the following EIP types must you choose:

- A. Static BGP
- B. Dynamic BGP

**B**

109) Which of the following CIDR blocks is not supported by the VPC service?

- A. 10.0.0.0 – 10.255.255.255
- B. 172.16.0.0 – 172.31.255.255
- C. 192.168.0.0 – 192.168.255.255
- D. 255.255.0.0 – 255.255.255.255

**B**

110) Which of the following are VPC features?

- A. Secure isolation
- B. Flexible deployment
- C. Dynamic BGP
- D. Hybrid deployment

111) Which of the following is NOT a component of the ELB service?

- A. Firewall
- B. Load Balancer
- C. Listener
- D. Instance (VM or application container)

112) Elastic Load Balance (ELB) can work independently.

- A. True
- B. False

113) AS must work with Elastic Load Balance (ELB).

- A. True
- B. False

114) Which of the following functions are supported by ELB?

- A. Creating a load balancer
- B. Deleting a load balancer
- C. Querying a load balancer
- D. Adjusting the bandwidth

115) Which of the following items is not required for adding a listener to a load balancer?

- A. A frontend protocol and port
- B. A VPC
- C. A certificate
- D. A load balancing algorithm

116) Which of the following load balancing algorithms are provided by ELB?

- A. Weighted round robin
- B. Weighted least connections
- C. Source IP hash
- D. Encryption algorithm
- E. Weighted

51

117) Which of the following protocols requires certificates?

- A.TCP
- B.UDP
- C.HTTP
- D.HTTPS

52

118) Which of the following protocols does ELB support?

- A.TCP
- B.UDP
- C.HTTP
- D.HTTPS

53

119) ELB supports servers running different OSs.

- A. True
- B. False

54

120) Which of the following services can be used to view real-time monitoring data of load balancers and listeners?

- A.Cloud Container Engine
- B.Cloud Eye
- C.Auto Scaling
- D.Virtual Private Cloud

55

121) Which of the following statement about Direct Connect is incorrect?

- A.Direct Connect is a high-speed, low-latency, stable, and secure dedicated network connection that connects user's local data center to a VPC on a cloud.
- B.Direct Connect uses the Internet tunneling technology on the public network.
- C.To create a direct connection, users need to create a connection, a virtual gateway, and a virtual interface.
- D.Currently, only the yearly/monthly billing mode is supported.

56

122) To delete direct connection, you need to delete Virtual interface and the virtual GW bound with the virtual interface first  
A. True  
B. False

123) Can I access multiple VPCs using a direct connection?  
A. True  
B. False

124) Direct Connect enables a user to set up a dedicated network connection between a local data center and the public cloud. Currently, which of the following connection type is supported by Direct Connect? (S)  
A. MPLSVPN  
B. IPSecVPN  
C. SSL VPN  
D. OSPF VPN

125) In Route Mode, Static Route & BGP are supported?  
A. True  
B. False

126) To unsubscribe an operations connection, you need to delete the hosted connection depends on it, and then delete the virtual gateway and virtual interface associated with it.  
A. True  
B. False

127) In Huawei Cloud VPN, only IPsec is supported?  
A. True  
B. False

128) Direct Connect supports only duration based (Yearly/Monthly) billing mode?  
A. True  
B. False

129) Huawei Cloud VPN uses pay-per-use pricing?

- A. True
- B. False

130) Select incorrect related to VPN GW connection:

- A. In VPN, local GW is HUAWEI CLOUD IP address
- B. In VPN, Remote GW is the public IP address of the VPN connection in your DC
- C. In VPN, Local Subnet specifies the VPC subnets that need to communicate with your DC
- D. In VPN, Remote Subnet specifies the subnets of your DC

131) Which of the following features can be used together with the Direct Connect/VPN/Cloud Connect?

- A. SNAT
- B. DNAT
- C. Both

132) Which of the following policies must be consistent between the local and remote sides of a VPN that connects HUAWEI CLOUD and a local data center?

- A. SSL
- B. IPv6
- C. IKE
- D. IPSec

133) Can VPN gateway have multiple connections?

- A. True
- B. False

134) Does the IPsec VPN Support Automatic Negotiation?

- A. True
- B. False

- 135) What are customer requirements for cloud security?
- A. CSA Top Threats
  - B. National legal compliance requirements
  - C. Service continuity
  - D. Data confidentiality

- 136) Which of the following are CSA TOP threats?
- A. Account hijacking
  - B. Malicious internal personnel
  - C. Data leakage and loss
  - D. Abuse and malicious use of cloud services
  - E. Insufficient management of identity, credentials, and access
  - F. Insecure ports and APIs

- 137) Data Security includes:
- A. DEW (Data Encryption Workshop)
  - B. HSS (Host Security Service)
  - C. CGS (Container Guard Service)
  - D. DBSS (Database Security Service)

- 138) Which of the following statements about AAD is incorrect?
- A. AAD does not support high-defense IP address access for multiple lines.
  - B. The Anti-DDoS cluster provides Layer 4 DDoS attack cleansing and works with GameCC for attack blocking.
  - C. The WAF cluster provides DDoS attack cleansing and web CC defense on Layer 7.
  - D. AAD supports various cloud services.

- 139) With data security as its core, HUAWEI CLOUD builds a series of security services to meet the particular needs. Security services include:
- A. Data Security
  - B. Host Security
  - C. Application Security
  - D. Network Security

- 140) Which of the following security services can be used to protect websites?

- A. WAF
- B. VSS
- C. SCM
- D. Anti-DDoS

141) What are the basic functions of HSS?

- A. Asset management
- B. Vulnerability management
- C. Baseline inspection
- D. Intrusion detection

142) Which of the following statements about HTTPS site protection is incorrect?

- A. When an HTTPS service is released to users, the HTTPS certificate needs to be uploaded for using WAF.
- B. No matter whether the original website server provides HTTPS or HTTP services, users can have HTTPS services when using WAF.
- C. The basic edition does not support HTTPS protection.
- D. A domain name can choose to use either HTTP or HTTPS protocols only.

143) Which of the following problems can WAF solve?

- A. The service server of an e-commerce website cannot respond to normal requests because its order interface is overly invoked.
- B. Numerous exclusive and beautiful pictures on a website are crawled by competitors in batches.
- C. A website faces threats such as SQL and command code injection.
- D. The website server is infected with viruses and CPU usage remains high.

144) Which of the following scenarios can WAF apply to?

- A. The official website of a university deployed on the education portal
- B. An enterprise portal in a self-deployed data center
- C. A testing website deployed in a LAN
- D. An open website deployed on the platforms of other cloud vendors

145) Which of the following is NOT a capability of Web Application Firewall (WAF)?

- A. Anti-SQL injection
- B. Anti-Webshell uploading
- C. Anti-leeching

D. Anti-traffic attack

146) WAF detects abnormal requests to prevent network intrusions such as webpage tampering, information leak, and Trojan horse implantation.

- A. True
- B. False

147) Which of the following problems can VSS solve?

- A. Help tenants detect web vulnerabilities.
- B. Help users detect weak passwords of the host.
- C. Guide tenants in fixing the root cause of security vulnerabilities.
- D. Help tenants repair or intercept vulnerabilities.

148) Which of the following statements about VSS is incorrect?

- A. VSS is installation and maintenance free, requiring no extra labor cost. The service is offered in the basic (free of charge) and professional (additional fees) editions to meet the requirements of users.
- B. VSS is easy to use and can be enabled with one click.
- C. VSS is able to dynamically adjust the scanning frequency to ensure service availability.
- D. Users need to manually upgrade the vulnerability library before scanning to improve scanning accuracy.

149) Which of the following statements about VSS is incorrect?

- A. VSS has no industry restrictions and can be widely applied in industries such as finance, government, and transportation.
- B. Users should have obtained a HUAWEI CLOUD account before using VSS.
- C. If a tenant's web site or applications can be accessed through the public network, VSS is available.
- D. The tenant needs to deploy services on VMs of HUAWEI CLOUD.

150) Which of the following domain name types is \*.huaweicloud.com?

- A. Single domain name
- B. Wildcard domain name
- C. Multiple domain names

- 151) What are the challenges of defending against DDoS attacks?
- A. Limited performance of the protection device
  - B. Insufficient service capabilities
  - C. Low Internet bandwidth

- 152) Which of the following protocols does AAD support?
- A. TCP
  - B. UDP
  - C. HTTPS
  - D. HTTP

- 153) Which of the following service is a data security service?
- A. Host Intrusion Detection (HID)
  - B. Host Vulnerability Detection (HVD)
  - C. Key Management Service (KMS)
  - D. SSL/TLS Certificate Service (SCS)

- 154) EVS Disks are associated with one Back-up Policy?
- A. True
  - B. False

- 155) OBS can access through OBS Console or OBS Browser
- A. True
  - B. False

- 156) A file system can be mounted to ECSs in different VPCs?
- A. True
  - B. False

- 157) AS can only dynamically add or reduce ECS in Specified interval?
- A. True

B. False

158) Anti DDOS can mitigate which kind of attack:

- A. Volume attack
- B. Brute force

159) Which of the following statements about KMS are correct?

- A. The key and random numbers are generated by the certified third-party hardware security module.
- B. The master key of a user is stored redundantly online.
- C. KMS is deeply integrated with computing and storage services such as ECS, EVS, IMS, OBS, EVS, and VBS. KMS is used to manage the keys of these services.
- D. The number of keys can be dynamically adjusted based on service development.

160) Which of the following statements about KMS are correct?

- A. KMS provides views for users to uniformly manage encryption keys so that the usage of all keys can be visualized.
- B. Users can control the key and manage the lifecycle covering key generation, rotation, and destruction.
- C. Users can easily manage the encryption key used for encrypting data stored in your applications by invoking APIs.
- D. With the built-in auditing capability, KMS logs provide detailed information about access keys to help you meet regulatory compliance.

161) Which of the following statements about Dedicated HSM are correct?

- A. The key calculation of Dedicated HSM is performed on an exclusive encryption card. Services for different tenants are isolated without affecting performance.
- B. Dedicated HSM supports China-invented encryption algorithms such as SM<sub>1</sub>, SM<sub>2</sub>, SM<sub>3</sub>, and SM<sub>4</sub>.
- C. Dedicated HSM is recommended for all data encryption requirements on the cloud to ensure security.
- D. Dedicated HSM is a hosting service that can automatically perform time-consuming tasks, such as hardware presetting, software patching, high availability, and backup.

162) Which of the following problems does a website tenant not need to consider when selecting a package or edition?

- A. Threat types concerning the service website
- B. Web service framework and the system version of the server
- C. Number of domain names and subdomain names that need protection
- D. Service traffic volume

163) Which of the following are the advantages of SCM?

- A. Improved website security
- B. Optimized website image
- C. Higher search engine rankings

164) Which of the following domain name types does SCM support?

- A. Single domain name
- B. Wildcard domain name
- C. Multiple domain names

165) What layer attacks Anti DDOS can withstand?

- A. Layer 4 to Layer 7

166) Which of the following technologies does SA use?

- A. Big Data
- B. Web Crawlers
- C. Encryption
- D. ID Authentication

167) Cloud Eye is a multi-dimensional resource monitoring platform. You can use Cloud Eye to monitor the utilization of service resources, track the running status of cloud services, configure alarm rules and notifications, and quickly respond to resource changes.

- A. True
- B. False

168) Server Monitoring includes:

- A. Basic Monitoring
- B. OS Monitoring
- C. CPU Monitoring
- D. Disk Monitoring

168

169) Which rollup methods does Cloud Eye support ( )?

- A. Max.
- B. Min.
- C. Avg.
- D. Sum
- E. Variance

169

170) Cloud Eye can be used to:

- A. monitor the utilization of service resources
- B. track the running status of cloud services
- C. configure alarm rules and notifications
- D. respond to resource changes

170

171) Which tool monitors RDS DB.

- A. ECS
- B. VPC
- C. OBS
- D. Cloud Eye

171

172) Which of the following DB instances can RDS create? (O)

- A. MySQL
- B. SQL Server
- C. MongoDB
- D. PostgreSQL

172

173) The Key Features of RDS include:

- A. High Availability
- B. Backup and Restoration
- C. DB Instance Monitoring
- D. High security

173

174) RDS does not support data backup or restoration.

- A. True
- B. False

175) To retrieve Alarm History for 7 days. What Service you will use? (Single Choice)

- A. SMN
- B. CTS
- C. ECS
- D. RDS

176) Where to restore RDS instance from?

- A. Xxx
- B. ECS
- C. VPC
- D. OBS

177) HUAWEI CLOUD EI provides 45 services and 142 functions.

- A. True
- B. False

178) What are the advantages of HUAWEI CLOUD EI service ModelArts? (O)

- A. Readily acquired
- B. Fast training
- C. Fast launch
- D. One-stop

179) Which of the following Huawei Cloud EI APIs are vision related?

- A. Face Recognition
- B. Image Recognition
- C. Content Moderation
- D. Image search

180) DWS is the Enterprise - Class Data Warehouse.

- A. True
- B. False

181) Which EI service can implement large scale data analysis and query?

- A. DLF
- B. DWS
- C. DIS
- D. GES

182) Which of the following is NOT a security feature on API Gateway?

- A. App authentication
- B. Request throttling
- C. IP address blacklist
- D. Security sandbox

183) What SDK Languages Does API Gateway Support?

- A. Java
- B. Go
- C. Python
- D. C#
- E. JavaScript
- F. PHP
- G. C
- H. C++
- I. Android
- J. Delphi

All except J

184) You can enable API Gateway and create and manage APIs for free? You pay only for the number of API calls received and the amount of data transmitted.

- A. True
- B. False

185) Do I Need to Publish an API Again After Modification?

- A. True
- B. False

186) By default, an API can be called up to 200 times per second?

- A. True
- B. False

187) ECS Login Modes?

- A. Key pair
- B. OTP Token
- C. Fingerprint
- D. Password

188) What are Auto Scaling Policy Actions? (multiple choice)

- A. Modify
- B. Replicate
- C. Enable
- D. Delete

189) AS Policies that dynamically expand? (single Choice)

- A. Random
- B. Alarm
- C. Schedule
- D. Periodic

190) Which are VPC access control functions?

- A. Security group
- B. Network access list
- C. Fingerprint
- D. Password

191) The traditional IT infrastructure architecture cannot easily support enterprise operations, and architecture transformation is required. Which of the following is not a main reason?

- A. Slow service rollout and complex lifecycle management

- B. High TCO
- A. Key application performance is limited by I/O bottlenecks.
- D. Slow network speed

192) Cloud computing is a model that enables users to obtain resources (such as computing, storage, network, applications, and services) from a shared, configurable resource pool anytime, anywhere. Resources can be quickly supplied and released, minimizing management workload and interactions among service providers.

- A. True
- B. False

193) Which of the following statements about hybrid clouds is incorrect?

- A.They centrally manage enterprises' resources on both public and private clouds.
- B.They allow service applications to move seamlessly between public and private clouds.
- C.They leverage both public and private cloud advantages to optimize resource configuration.
- D.Applications can be deployed only on the public cloud.

194) How long does it take to obtain an ECS? (S)

- A. Several seconds
- B. Several minutes
- C. Several hours
- D. Several days

195) Traffic from internet will hit to the which device first?

- A. Firewall
- B. NGIX
- C. ELB

196) If EVS disk capacity is not sufficient then you need to dettach disk from ECS and add new disk?

- A. True
- B. False

197) Which scaling action is not performed on Bandwidth scaling policy?

- A. Replicate
- B. Add
- C. Reduce
- D. Set to

198) Which component is not deleted automatically when DB instance is deleted?

A. manual backup

199) You can change CPU or memory of a DB instance

- A. True
- B. False

200) The management console can be used without logging in.

- A. True
- B. False

201) After creating ECS, bandwidth cannot be changed.

- A. True
- B. False

202) When creating ECS you can use File injection function to initialize it.

- A. True
- B. False

203) The server does not need to be stopped before restoring EVS disk data using VBS backup.

- A. True
- B. False

204) How are regions divided?

- A. Based on AZ
- B. Geographic location and Network Latency

C. Cluster servers

205) Logging function of a bucket – where can log file be stored?

- A. Any bucket
- B. Enable logging
- C. The bucket on which logging is enabled
- D. All other buckets except the one which is logging

206) When compared with shared file systems what are the advantages of SFS:

- A. Robust reliability
- B. Seamless integration
- C. File sharing
- D. Easy operations, **high** cost- (wrong, should be low)

207) Primary DB instance can replicate data to secondary DB Instances in :

- A. Asynchronous
- B. Semi-synchronous
- C. Synchronous

208) What is ECS lifecycle?

- A. Start
- B. Stop
- C. Restart
- D. Delete

209) which of the following is not included in devcloud:

- A. Data backup
- B. Project Management
- C. Code Check
- D. Cloud build

210) Bucket A has been configured a policy not to allow any users to access it. Object B is inside Bucket A. Object B has an ACL that allows any users to access it. Therefore, object B can be access anonymously by any user.

- A. True
- B. False

211) "Faster Inclusive AI Development"?

- A. DLS
- B. MLS
- C. ModelArts
- D. GES

212) API lifecycle?

- A. Create
- B. Publish
- C. Authorize
- D. Remove

213) The NAT Gateway service is charged.

- A. True
- B. False

214) NAT Gateway supports smooth upgrade.

- A. True
- B. False

215) In one VPC, only one NAT gateway can be created.

- A. True
- B. False

216) After a NAT gateway is used, the EIP assigned to the original ECS becomes invalid.

- A. True
- B. False

217) NAT Gateway supports disaster recovery across AZs.

- A. True
- B. False

218) Which of the following functions of NAT Gateway can be used to enable ECSs to share an EIP to access the Internet?

- A. SNAT
- B. DNAT

219) Which of the following statements about NAT Gateway is incorrect?

- A. An SNAT server is more stable than the NAT Gateway service.
- B. NAT Gateway supports security isolation.
- C. NAT Gateway supports up to 1 million concurrent SNAT connections.
- D. NAT Gateway supports up to 200 DNAT rules.

220) Which of the following statements about NAT Gateway is incorrect?

- A. After the number of SNAT connections reaches the upper limit, new sessions cannot be created.
- B. Cloud Eye allows you to view the number of SNAT connections.
- C. Cloud Eye allows you to view the IP addresses of top 10 VMs that occupy the largest number of SNAT connections.
- D. Cloud Eye does not support setting alarms for the number of connections.

221) Which of the following statements about NAT Gateway is correct?

- A. DNAT provides services for external networks.
- B. DNAT also has the concept of the number of connections.
- C. DNAT supports TCP, UDP, and ICMP port mapping.
- D. DNAT does not support mapping all ports.

222) Which of the following is not the component of Big Data Platform?

- A. Map Reduce
- B. Openstack

- C. HDFS
- D. Yarn

- 223) An ECS must be stopped before it is used to create an image?
- A. True
  - B. False

- 224) An ECS can be attached to multiple EVS disks?
- A. True
  - B. False

- 225) ELB provides only three types of load balancing algorithms?
- A. True
  - B. False

- 226) IMS provides comprehensive and flexible self-service image management capabilities. Users can create a private image and use it to create an ECS or multiple ECSs?
- A. True
  - B. False

- 227) All Huawei Cloud services can be viewed on the management console?
- A. True
  - B. False

- 228) Which of the following component can be used to set an access control whitelist to allow specific IP addresses to access load balancers?
- A. Listener
  - B. Backend Server
  - C. Backend Server Group
  - D. Health Check

229) Which of the following is not an advantage of RDS compared with self-built databases?

- A. Instant Availability
- B. Easy Management
- C. Elastic Scaling
- D. Self-Installed Databases

230) To which of the following scenario does OCR apply?

- A. Image Processing
- B. Image Recognition
- C. Character Recognition
- D. Speech Recognition

231) Which of the following can isolate RDS network resources from other services?

- A. ECS
- B. VPC
- C. CES
- D. OBS

232) Which of the following operations is not supported by EVS?

- A. Attaching/Detaching
- B. Capacity Expansion
- C. Capacity Reduction
- D. Backup

233) Which of the following are advantages of IAM?

- A. Permission Management
- B. Security Control
- C. Agency management
- D. Federated ID Authentication

234) Which of the following are advantages of Cloud Eye?

- A. Automatic Provisioning

- B. Real Time & Reliable Monitoring
- C. Visualized Monitoring
- D. Multiple Notification Types

235) A file system can be mounted to:

- A. A Linux ECS
- B. A Windows ECS
- C. A Bare Metal Server
- D. Dedicated Computing Cluster

236) Which is true about instance removal:

- If number of instances is greater than in AS group, some are removed
- When removed, the balance between AZs is not taken into account
- 
- 

237) Does OBS support batch upload?

238) When EVS disk is detached; data will be lost?

239) After the subnet is created; CIDR block can be changed?

240) SFS can be mounted to Windows ECS?

241) CCE Auto Scaling Models?

242) What are disadvantages of building your own Database?

- A. Out of the Box
- B. Stable
- C. Easy Manageability
- D. High Investment

243) How many AS configurations can be set for AS Group?

244) What is required by a workspace user to access USB connected to a terminal?

- A. Clipboard Redirection
- B. USB Port Redirection
- C. Printer Redirection
- D. User cannot access

245) Incorrect about KMS?

- A. manage cloud platform & tenants' keys
- B. uses HSM
- C. uses multi-layer key protection
- D. can be integrated with apps

246) How to make an app created in a container accessible externally?

- A. Deploy more than 2 nodes in container cluster

- B. Assign 2 GB memory to each node
- C. Publish app as a service
- D. Bind app to ELB

247) What is not a capability of Anti DDOS?

- A. Defend against DDOS Attacks
- B. Monitor Individual IP
- C. Provide Interception reports for individual IP
- D. Regularly scan ECS for vulnerabilities

248) If 10GE is used to connect using Direct Connect? What port is it?

- A. Electrical
- B. Optical
- C. Ethernet
- D. Serial

249) What is required on Workspace to support 3D applications?

- A. CPU with Hardware Virtualization
- B. GPU
- C. iNIC
- D. SSD

250) For Monitoring Metrics Data, the retention policy differs by roll up period. For how many days the data is retained with one hour roll up period?

- A. 10
- B. 20
- C. 155
- D. 300

251) What is not an objective of cloud computing security services?

- A. User Security
- B. Cloud Platform Security
- C. Data Security
- D. Service Security

252) What are the issues with conventional PCs?

- A. High Cost
- B. Poor Video Playback
- C. Poor Software Compatibility
- D. PC User behavior cant be monitored

253) Not the advantage of Cloud Eye?

Can monitor 3<sup>rd</sup> party non-Huawei Cloud Services

254) Which are not the characteristics of RDS?

- A. High DBA Cost
- B. no need to purchase Hardware & software
- C. Only need RDS Rental Fee
- D. Low DBA Skill Requirement

255) Procedures to use CCE?

256) What are the pre requisites to create a container cluster?

- A. ECS has been created.
- B. VPC has been created
- C. ELB has been created
- D. AK/SK file has been uploaded to CCE

257) Stages of Lifecycle of RDS DB Instance?

258) Important protocols in IPSec framework?

A. IP B. IKE C. AH D. ESP

259) Which peripheral redirections are supported by workstation?

A. Printer  
B. USB  
C. File  
D. Clipboard

260) Cloud Eye notification methods?

261) Capabilities of Host Intrusion Detection?

A. Delete Brute force crack attack  
B. Warning of remote login attempts  
C. Detect weak passwords  
D. Detect permission of database process  
E. Detect web backdoors

262) What are scenarios for image replication?

A. Replicate unencrypted image to unencrypted image  
B. Replicate unencrypted image to encrypted image  
C. Replicate encrypted image to unencrypted image  
D. Replicate encrypted image to encrypted image

What are basic characteristics of cloud computing? (O)

- A. On-demand self-service
- B. broad network access methods
- C. Resource pooling
- D. fast and scalable
- E. Measurable services

Which of the following is generally used to provide application development and running environments? (AJ)

- A. IaaS
- B. PaaS
- C. SaaS

Of HuaweiCloud's service list page, which of the following service does NOT belong to the Computing category? (O)

- A. ECS
- B. BMS
- C. IMS
- D. SPS

An AZ contains one or multiple physical data centers. It has independent cooling, fire extinguishing, moisture-proof, and electricity facilities. Within an AZ, computing, network, storage, and other resources are logically divided into multiple clusters.

- A. True
- B. False

GPU-optimized ECSs can be applied to the following scenarios: cloud-based desktops, graphics rendering and engineering drawing run in virtualization environment. (S)

- A. True
- B. False

Which of the following are OBS application scenarios?

- A. Massive storage resource pool
- B. Static web hosting
- C. Big data storage
- D. Backup
- E. Archiving

Which of the following components are included in an ECS? (O)

- A. vCPU
- B. Memory
- C. Image
- D. EVS disk

ECSs can be charged in yearly/monthly or metered mode.

- A. True
- B. False

Which of the following service is used by an ECS to store data? (O)

- A. AS
- B. IMS
- C. EVS
- D. DeC

Which operations are required to use ECS to create a Windows image? (O)

- A. Configure the Windows ECS
- B. Install Cloudbase-Init
- C. Create a Windows private image
- D. Query and cleanup network rule files.

EVS provides the scalable, virtual block storage service, and the backend of EVS is based on a distributed architecture. (S)

- A. True
- B. False

Which of the following methods or tools can be used to access OBS? (O)

- A. OBS Console
- B. OBS Browser
- C. obscmd
- D. APIs and SDKs

Which of the following are the advantages of the VPC service?

- A. Security isolation
- B. Flexible deployment
- C. Dynamic BGP
- D. Hybrid cloud support

Which of the following operation incurs charges? (AJ)

- A. Create an EIP
- B. Create a subnet
- C. Create a VPC
- D. Create a security group

Can VPN gateway have multiple connections

- True
- false

Can I access multiple VPCs using a direct connection?

- A. True
- B. False

Which of the following is NOT a component of the ELB service?

- A. Firewall
- B. Load Balancer
- C. Listener
- D. Instance (VM or application container)

Direct Connect enables a user to set up a dedicated network connection between a local data center and the public cloud. Currently, which of the following connection type is supported by Direct Connect? (S)

- A. MPLSVPN
- B. IPSecVPN
- C. SSL VPN
- D. OSPF VPN

Which of the following service is a data security service? (O)

- A. Host Intrusion Detection (HID)
- B. Host Vulnerability Detection (HVD)
- C. Key Management Service (KMS)
- D. SSL/TLS Certificate Service (SCS)

Data Security includes:

- A. DEW
- B. HSS
- C. CGS
- D. DBSS

Which of the following is NOT a capability of Web Application Firewall (WAF)?

- A. Anti-SQL injection
- B. Anti-Webshell uploading
- C. Anti-leeching
- D. Anti-traffic attack

What are the advantages of HUAWEI CLOUD EI service ModelArts? (O)

- A. Readily acquired
- B. Fast training
- C. Fast launch
- D. One-stop

Which of the following is NOT a security feature on API Gateway?

- A. App authentication
- B. Request throttling
- C. IP address blacklist
- D. Security sandbox

Which of the following DB instances can RDS create? (O)

- A. MySQL
- B. SQL Server
- C. MongoDB
- D. PostgreSQL

The Key Features of RDS include:

- A. High Availability
- B. Backup and Restoration
- C. DB Instance Monitoring
- D. High security

The traditional IT infrastructure architecture cannot easily support enterprise operations, and architecture transformation is required. Which of the following is not a main reason (S)

- A. Slow service rollout and complex lifecycle management
- B. High TCO
- A. Key application performance is limited by I/O bottlenecks.
- D. Slow network speed

Cloud computing is a model that enables users to obtain resources (such as computing, storage, network, applications, and services) from a shared, configurable resource pool anytime, anywhere. Resources can be quickly supplied and released, minimizing management workload and interactions among service providers. (M)

- A. True
- B. False

Which of the following statements about hybrid clouds is incorrect?

- A.They centrally manage enterprises' resources on both public and private clouds.
- B.They allow service applications to move seamlessly between public and private clouds.

C.They leverage both public and private cloud advantages to optimize resource configuration.

**B. Applications can be deployed only on the public cloud.**

How long does it take to obtain an ECS? (S)

- A. Several seconds
- B. Several minutes.**
- C. Several hours
- D. Several days

What is the type of the image converted based on an existing ECS? (aj)

- A. Public image
- B. Private image**
- C. Shared image
- D. EulerOS image

Which of the following policies does AS support? (O)

- A. Scheduled policy**
- B. Periodic policy**
- C. Alarm policy**
- D. Random policy

**Elastic Load Balance (ELB) can work independently.**

True

**False**

AS must work with Elastic Load Balance (ELB).

A. True

**B. False**

VBS does not support backing up EVS disks in batches. (O)

A. True

**B. False**

On which of the following services does VBS depend? (M)

- A. Elastic Cloud Server
- B. Elastic Volume Service**
- C. Object Storage Service**
- D. Image Management Service

( ) records operations of VBS resources, facilitating query, audit, and backtracking) (AJ)

- A. Cloud Trace Service**
- B. Cloud Eye
- C. Elastic Volume Service
- D. Object Storage Service.

An EVS disk can be backed up only when it is in the ( ) state. (M)

- A. Available**
- B. In-use**
- C. Error
- D. Deletion failed

VBS backs up EVS disks and uses the backups to restore original EVS disks, protecting user data accuracy and security. (AJ)

**A. True**

B. False

Does VBS Support Cross-Region Backup and Restoration? (S)

A. True

**B. False**

VBS provides the data backup function for EVS disks. The created data backups can be used to create EVS disks. (S)

**A. True**

B. False

Which of the following functions are supported by ELB?

**A. Creating a load balancer**

**B. Deleting a load balancer**

**C. Querying a load balancer**

**D. Adjusting the bandwidth**

Which of the following items is not required for adding a listener to a load balancer?

A.A frontend protocol and port

**B.A VPC**

C.A certificate

D.A load balancing algorithm

API lifecycle? (AJ)

**Create -publish- authorize -remove**

Which of the following protocols requires certificates? (S)

A.TCP

B.UDP

C.HTTP

**D.HTTPS**

ELB supports servers running different OSs.

**A. True**

B. False

Which of the following protocols does ELB support?

**A.TCP**

**B.UDP**

**C.HTTP**

**D.HTTPS**

Which of the following services can be used to view real-time monitoring data of load balancers and listeners? (M)

A.Cloud Container Engine

**B.Cloud Eye**

C.Auto Scaling

D.Virtual Private Cloud

Which of the following statement about Direct Connect is incorrect?

A.Direct Connect is a high-speed, low-latency, stable, and secure dedicated network connection that connects user's local data center to a VPC on a cloud.

**B.Direct Connect uses the Internet tunneling technology on the public network**

C.To create a direct connection, users need to create a connection, a virtual gateway, and a virtual interface.

D.Currently, only the yearly/monthly billing mode is supported.

What are customer requirements for cloud security? (O)

- A.CSA Top Threats
- B.National legal compliance requirements
- C.Service continuity
- D.Data confidentiality

Anti DDOS can mitigate which kind of attack:

Volume attack

Brute force

WAF detects abnormal requests to prevent network intrusions such as webpage tampering, information leak, and Trojan horse implantation.

A. True

B. False

Cloud Eye is a multi-dimensional resource monitoring platform. You can use Cloud Eye to monitor the utilization of service resources, track the running status of cloud services, configure alarm rules and notifications, and quickly respond to resource changes.

A. True

B. False

Server Monitoring includes:

A. Basic Monitoring

B. OS Monitoring

C. CPU Monitoring

D. Disk Monitoring

Which of the Following Compute Services Does HUAWEI CLOUD Provide? (O)

A. Elastic Cloud Server (ECS)

B. Auto Scaling (AS)

C. Image Management Service (IMS)

D. Elastic Volume Service (EVS)

How many types of login users does HUAWEI CLOUD support?

A. 1

B. 2

C. 3

D. 4

Is an ECS a physical server?

A. Yes

B. No

What is used by an ECS to store data? (aj)

A. Auto Scaling

B. Elastic Volume Service

C. Cloud Container Engine

D. Cloud Eye

Which of the following methods does AS use to expand resources? (S)

A. Dynamically expanding resources

- B. Expanding resources as planned
- C. Manually expanding resources
- D. Automatically expanding resources

AS supports the following instance removal policies:

- A. Oldest instances created based on the oldest configuration
- B. Newest instances created based on the oldest configuration
- C. Oldest instances
- D. Newest instances

Which of the following policies does AS support? (O)

- A. Alarm policies
- B. Scheduled policies
- C. Periodic policies
- D. Monitoring policies

Before creating a data disk image from a data disk, ensure that the ECS has a system disk and the data disk is not empty.

- A. True
- B. False

What image types does IMS support? (O)

- A. Public image
- B. Private image
- C. Encrypted image
- D. Shared image

Private images can be classified into:

- A. System disk image
- B. Data disk image
- C. Full-ECS image
- D. Snapshot

Which of the followings are EVS disk types? (O)

- A. Ultra-high I/O
- B. High I/O
- C. Common I/O
- D. Optimized I/O
- E. Low Latency optimized I/O

How many servers can a shared EVS disk be attached to at most?

- A. 5
- B. 7
- C. 8
- D. 10

EVS can be attached to: (AJ)

- A. OBS
- B. ECS
- C. BMS
- D. VPC

VBD EVS disks support only basic SCSI read/write commands.

- A. True
- B. False

Access requests to OBS can be controlled by,

- A. ACL
- B. Bucket policies
- C. User signature authentication ?
- D. Server-side encryption

Which of the following are the application scenarios of SFS?

- A. Media processing
- B. Log management ?
- C. Content management and web directories
- D. High-performance computing (HPC)

Which of the Following Functions Are Provided by HUAWEI CLOUD VPC?

- A. Customizing CIDR blocks
- B. Customizing access control policies
- C. Accessing the Internet using EIPs
- D. Connecting a local data center using a VPN or Direct Connect connection

Which of the Following networks could be VPC subnet (S)

- 24
- 24
- 24
- 23 ALL PRIVATE SUBNETS

HUAWEI CLOUD provides Cloud Server Backup Service (CSBS) and Volume Backup Service (VBS) to protect your data against:

- A. viruses
- B. unintentional deletions
- C. software faults
- D. hardware faults

Which of the following load balancing algorithms are provided by ELB? (AJ)

- A. A. Weighted round robin
- B. B. Weighted least connections
- C. C. Source IP hash
- D. D. Encryption algorithm
- E. E. Weighted

Which of the following security services can be used to protect websites?

- A. WAF
- B. VSS
- C. SCM
- D. Anti-DDoS

Which rollup methods does Cloud Eye support ( )?

- A. Max
- B. Min
- C. Avg
- D. Sum
- E. Variance

Which of the following are deployment models of cloud computing?

- A. Public cloud
- B. Private cloud
- C. Hybrid cloud
- D. Community/industry cloud

What is the data durability of OBS?

- A. 10 nines (99.99999999%)
- B. 11 nines (99.999999999%)**
- C. 12 nines (99.999999999%)

What is the basic storage unit in OBS?

- A. File
- B. Block
- C. Object**
- D. Bucket

Which of the following operations on buckets is not available in OBS?

- A. Creation
- B. Formatting**
- C. Modification
- D. Deletion

If you download an object of the Standard storage class through a HUAWEI CLOUD ECS server, which one of the following items is billed?

- A. Traffic
- B. Request**
- C. Data restoration
- D. Storage capacity

If you download an object of the Archive storage class to your local computer over the Internet, which one of the following items is billed?

- A. Traffic
- B. Request
- C. Data restoration
- D. Traffic+Request+Data restoration**

If a customer has some data to store and the data will be downloaded for only 10 times in a year, which of the following storage class is recommended?

- A. Standard storage class
- B. Infrequent Access storage class**
- C. Archive storage class
- D. Block storage

Which of the following statements about the data in the Archive storage class is correct?

- A. Data in the Archive storage class can be directly downloaded by calling the API.
- B. Data in the Archived storage class can be accessed directly.
- C. If you want to access data in the Archive storage class, you need to restore the data first. Restored data is in the Standard storage class.**
- D. If you want to access data in the Archive storage class, you need to restore the data first. Restored data is in the Infrequent Access storage class.

Which of the following statements about lifecycle rules is correct?

- A. Lifecycle rules support transition between storage classes by hour.
- B. Lifecycle rules for objects of historical versions take effect only when versioning is enabled for the bucket.**
- C. Lifecycle rules for objects of historical versions cannot be configured if versioning is not enabled for the bucket.

Which of the following items cannot be configured when creating a bucket?

- A. Region where bucket resides
- B. Storage class of a bucket
- C. Bucket policy

**D. Static website hosting**

Which of the following items cannot be configured when uploading an object?

- A. File path
- B. Storage class of the object
- C. KMS encryption
- D. File size**

Which storage classes does OBS offer? (O)

- A. Archive storage class**
- B. Backup storage class
- C. Infrequent Access storage class**
- D. Standard storage class**

The Virtual Private Cloud (VPC) service enables you to provision logically isolated, configurable, and manageable virtual networks, improving the cloud resource security and simplifying network deployment. (S)

- A. True**
- B. False

Which tool monitors RDS DB.

ECS  
VPC  
OBS

**And correct one**

Which of the following cannot be configured in a VPC? (S)

- A. Subnet
- B. Security group
- C. Elastic IP address
- D. Bandwidth
- C. Load balancing**

Which of the following must be configured to enable an ECS without a bound EIP to access the Internet through an ECS with a bound EIP?

- A. Route table**
- B. Shared bandwidth
- C. Load balancing

How many network interface cards (NICs) does an ECS functioning as a SNAT server require?

- A. 1**
- B. 2
- C. 3

Which of the following correctly describes the default security group rule?

- A. All outbound traffic is allowed, and ECSs associated with the same security group can access each other.**
- B. All inbound traffic is allowed, and ECSs associated with the same security group can access each other.
- C. All outbound traffic is allowed, and ECSs associated with the same security group cannot access each other.
- D. All inbound traffic is allowed, and ECSs associated with the same security group cannot access each other.

Which of the following can enable an ECS in a VPC to communicate with a host in a private data center?

- A. Internet connection
- B. VPN**
- C. VPC peering connection

To delete direct connection you need to delete Virtual GW and virtual interfaces first

- True**
- False

Select incorrect related to VPN GW connection:

**A VPN local GW is HUAWEI CLOUD IP address**

Which of the following CIDR blocks is not supported by the VPC service? (S)

- A. 10.0.0.0 – 10.255.255.255
- B. 172.16.0.0 – 172.31.255.255
- C. 192.168.0.0 – 192.168.255.255
- D. 255.255.0.0 – 255.255.255.255**

Which of the following is optional when you create a subnet?

- A. Name
- B. CIDR block
- C. Gateway
- D. Tag**

If you have high requirements on network stability and availability, which of the following EIP types must you choose:

- A. Static BGP
- B. Dynamic BGP**

Which of the following policies must be consistent between the local and remote sides of a VPN that connects HUAWEI CLOUD and a local data center?

- A. SSL
- B. IPv6
- C. IKE**
- D. IPSec**

SFS is charged in pay-per-use or monthly/yearly flat fee mode.

- A. True**
- B. False

SFS includes the SFS and SFS Turbo products.

- A. True**
- B. False

SFS supports the EXT4 and NTFS protocols.

- A. True
- B. False**

SFS can be connected to the AD domain controller for permission control.

- A. True
- B. False**

SFS allows ECSs in different VPCs to access the same file system.

- A. True**
- B. False

What is the maximum size of a single file supported by SFS?

- A. 32 TB
- B. 64 TB
- C. 128 TB
- D. 248 TB**

What is the maximum bandwidth supported by SFS?

- A. 2 GB/s
- B. 5 GB/s
- C. 10 GB/s
- D. 20 GB/s**

Which of the following file protocol is supported by SFS Turbo? (O)

- A. NFS v3**
- B. NFS v4
- C. SMB 2.0/2.1/3.0
- D. EXT4

What is the minimum latency of SFS Turbo?

- A. 10 ms
- B. 5 ms
- C. 2 ms
- D. 1 ms**

What is the maximum IOPS supported by SFS Turbo?

- A. 5,000
- B. 10,000
- C. 20,000
- D. 30,000**

Which of the following protocols are supported by SFS?

- A. NFS v3**
- B. NFS v4
- C. FTP
- D. EXT4

Which of the following are mainstream storage types in the industry?

- A. Block storage**
- B. File storage**
- C. Object storage**
- D. Backup storage

Which of the following are HUAWEI CLOUD file storage services?

- A. SFS**
- B. SFS Turbo**
- C. SFS Plus
- D. All of the above

Which scenarios does SFS suit?

- A. HPC**
- B. Media**
- C. File sharing**
- D. Game

Which scenarios does SFS Turbo suit?

- A. HPC
- B. Media

- C. High-performance websites
- D. Software development

Which of the following statements about AAD is incorrect?

- A. AAD does not support high-defense IP address access for multiple lines.
- B. The Anti-DDoS cluster provides Layer 4 DDoS attack cleansing and works with GameCC for attack blocking.
- C. The WAF cluster provides DDoS attack cleansing and web CC defense on Layer 7.
- D. AAD supports various cloud services.

What is the basic capability of HSS?

- A. Risk analysis and prevention capability
- B. Attack defense capability
- C. Intrusion detection capability

Which of the following statements about HTTPS site protection is incorrect?

- A. When an HTTPS service is released to users, the HTTPS certificate needs to be uploaded for using WAF.
- B. No matter whether the original website server provides HTTPS or HTTP services, users can have HTTPS services when using WAF.
- C. The basic edition does not support HTTPS protection.
- D. A domain name can choose to use either HTTP or HTTPS protocols only

Which of the following problems does a website tenant not need to consider when selecting a package or edition?

- A. Threat types concerning the service website
- B. Web service framework and the system version of the server
- C. Number of domain names and subdomain names that need protection
- D. Service traffic volume

Which of the following statements about VSS is incorrect?

- A. VSS is installation and maintenance free, requiring no extra labor cost. The service is offered in the basic (free of charge) and professional (additional fees) editions to meet the requirements of users.
- B. VSS is easy to use and can be enabled with one click.
- C. VSS is able to dynamically adjust the scanning frequency to ensure service availability.
- D. Users need to manually upgrade the vulnerability library before scanning to improve scanning accuracy

Which of the following statements about VSS is incorrect?

- A. VSS has no industry restrictions and can be widely applied in industries such as finance, government, and transportation.
- B. Users should have obtained a HUAWEI CLOUD account before using VSS.
- C. If a tenant's web site or applications can be accessed through the public network, VSS is available.
- D. The tenant needs to deploy services on VMs of HUAWEI CLOUD

Which of the following domain name types is \*.huaweicloud.com?

- A. Single domain name
- B. Wildcard domain name
- C. Multiple domain names

Which of the following are CSA TOP threats? (O)

- A. Account hijacking
- B. Malicious internal personnel
- C. Data leakage and loss
- D. Abuse and malicious use of cloud services

- E. Insufficient management of identity, credentials, and access
- F. Insecure ports and APIs

What are the challenges of defending against DDoS attacks?

- A. Limited performance of the protection device
- B. Insufficient service capabilities
- C. Low Internet bandwidth

Which of the following protocols does AAD support?

- A. TCP
- B. UDP
- C. HTTPS
- D. HTTP

What are the basic functions of HSS? (S)

- A. Asset management
- B. Vulnerability management
- C. Baseline inspection
- D. Intrusion detection

What are the application scenarios of HSS?

- A. Security risk management
- B. Intrusion detection
- C. Security compliance

Which of the following problems can WAF solve?

- A. The service server of an e-commerce website cannot respond to normal requests because its order interface is overly invoked
- B. Numerous exclusive and beautiful pictures on a website are crawled by competitors in batches
- C. A website faces threats such as SQL and command code injection
- D. The website server is infected with viruses and CPU usage remains high.

Which of the following scenarios can WAF apply to?

- A. The official website of a university deployed on the education portal
- B. An enterprise portal in a self-deployed data center
- C. A testing website deployed in a LAN
- D. An open website deployed on the platforms of other cloud vendors

Which of the following problems can VSS solve?

- A. Help tenants detect web vulnerabilities
- B. Help users detect weak passwords of the host
- C. Guide tenants in fixing the root cause of security vulnerabilities
- D. Help tenants repair or intercept vulnerabilities.

Which of the following statements about KMS are correct?

- A. The key and random numbers are generated by the certified third-party hardware security module
- B. The master key of a user is stored redundantly online
- C. KMS is deeply integrated with computing and storage services such as ECS, EVS, IMS, OBS, EVS and VBS. KMS is used to manage the keys of these services
- D. The number of keys can be dynamically adjusted based on service development

Which of the following statements about KMS are correct?

- A. KMS provides views for users to uniformly manage encryption keys so that the usage of all keys can be visualized.
- B. Users can control the key and manage the lifecycle covering key generation, rotation, and destruction.
- C. Users can easily manage the encryption key used for encrypting data stored in your applications by invoking APIs.
- D. With the built-in auditing capability, KMS logs provide detailed information about access keys to help you meet regulatory compliance.

Which of the following statements about Dedicated HSM are correct?

- A. The key calculation of Dedicated HSM is performed on an exclusive encryption card. Services for different tenants are isolated without affecting performance.
- B. Dedicated HSM supports China-invented encryption algorithms such as SM1, SM2, SM3, and SM4.
- C. Dedicated HSM is recommended for all data encryption requirements on the cloud to ensure security.
- D. Dedicated HSM is a hosting service that can automatically perform time-consuming tasks, such as hardware presetting, software patching, high availability, and backup.

Which of the following are the advantages of SCM?

- A. Improved website security.
- B. Optimized website image.
- C. Higher search engine rankings.

Which of the following domain name types does SCM support?

- A. Single domain name.
- B. Wildcard domain name.
- C. Multiple domain names.

Auto Scaling (AS) is charged.

- A. True
- B. False

AS can work with Elastic Load Balance (ELB), which automatically distributes access traffic across ECS instances in the AS group through the listener, improving system availability.

- A. True
- B. False

Alarm policies support system monitoring and custom monitoring.

- A. True
- B. False

An instance added to an AS group by an AS policy cannot be manually removed from the group.

- A. True
- B. False

AS can automatically adjust ECS and bandwidth resources. (O)

- A. True
- B. False

Which of the following policies can be configured to increase the number of instances in an AS group at a predetermined time each week? (M)

- A. Alarm policy

- B. Scheduled policy
- C. Periodic policy**
- D. All of the above

Which of the following statements about AS is incorrect?

- A. AS can automatically adjust the number of instances in an AS group based on preset policies.
- B. AS can perform health checks on instances in an AS group.
- C. Instance protection can be enabled on specified instances in an AS group.
- D. AS does not allow users to view the status of instances in an AS group.**

Which of the following statements about scaling actions is incorrect? (M)

- A. When the number of instances in an AS group is not the same as expected, a scaling action is triggered.
- B. After an AS group is disabled changing the number of expected instances triggers a scaling action.**
- C. When a trigger condition of an AS policy is met, a scaling action is triggered automatically.
- D. Lifecycle hooks help users better manage scaling actions.

Which of the following statements about AS configuration is correct?

- A. An AS configuration defines the specifications of EC2s to be added to an AS group.**
- B. An AS configuration that has been created can be modified as needed.
- C. After an AS group is enabled, its AS configuration cannot be changed.
- D. An unlimited number of AS configurations can be created.

How many types of policies does AS support?

- A. 0
- B. 1
- C. 2
- D. 3**

Which of the following policies are supported by AS? (AJ)

- A. Alarm policy**
- B. Scheduled policy**
- C. Periodic Policy**
- D. Random policy

How can instances be added to an AS group? (M)

- A. By an AS policy**
- B. Manually**
- C. By a change to the number of expected instances**
- D. By AS configuration

Which operations can be performed on an AS policy?

- A. Execute now**
- B. Modify**
- C. Enable**
- D. Delete**
- E. Disable**

Which of the following services are associated with AS?

- A. Cloud Eye**
- B. Virtual Private Cloud (VPC)**
- C. Elastic Load Balance (ELB)**

**D. Elastic Cloud Server (ECS)**

Which of the following monitoring metrics are supported by the alarm policy?

- A. CPU Usage**
- B. Inband Incoming Rate**
- C. Disk Read Requests**
- D. Memory Usage**
- E. Custom monitoring metrics**

Which of the following are ECS types? (O)

- A. Storage-optimized**
- B. Computing-accelerated**
- C. Computing-optimized**
- D. Memory-optimized**
- E. General computing**

Which of the following are VPC features?

- A. Secure isolation**
- B. Flexible deployment**
- C. Dynamic BGP**
- D. Hybrid deployment**

Advantages of VPC are:

- A. Secure and Reliable**
- B. Flexible Configuration**
- C. High-Speed Access**
- D. Interconnection??

Which operations are required for creating a Windows image using an ECS?

- A. Configure the Windows ECS**
- B. Install Cloudbase-init**
- C. Create a Windows private image**
- D. View and delete network rule files

The NAT Gateway service is charged.

- A. True**
- B. False

NAT Gateway supports smooth upgrade.

- A. True**
- B. False

In one VPC, only one NAT gateway can be created.

- A. True**
- B. False

After a NAT gateway is used, the EIP assigned to the original ECS becomes invalid.

- A. True
- B. False**

NAT Gateway supports disaster recovery across AZs.

- A. True**
- B. False

Which of the following functions of NAT Gateway can be used to enable ECSs to share an EIP to access the Internet?

- A. SNAT**

B. DNAT

Which of the following statements about NAT Gateway is incorrect?

- A. An SNAT server is more stable than the NAT Gateway service.
- B. NAT Gateway supports security isolation.
- C. NAT Gateway supports up to 1 million concurrent SNAT connections.
- D. NAT Gateway supports up to 200 DNAT rules.

Which of the following statements about NAT Gateway is incorrect?

- A. After the number of SNAT connections reaches the upper limit, new sessions cannot be created.
- B. Cloud Eye allows you to view the number of SNAT connections.
- C. Cloud Eye allows you to view the IP addresses of top 10 VMs that occupy the largest number of SNAT connections.

D. Cloud Eye does not support setting alarms for the number of connections.

Which of the following statements about NAT Gateway is correct?

- A. DNAT provides services for external networks.
- B. DNAT also has the concept of the number of connections.
- C. DNAT supports TCP, UDP, and ICMP port mapping.
- D. DNAT does not support mapping all ports.

Which of the following features can be used together with the Direct Connect/VPN/Cloud Connect?

- A. SNAT
- B. DNAT
- C. Both

Pain Points of Current Enterprise IT Infrastructure includes: (M)

- A. Slow Business Launch
- B. Complicated Lifecycle Management
- C. High TCO
- D. I/O Bottleneck

RDS can restore backup

-true

Traffic from internet will hit to the which device first (AJ)

1. firewall
2. NGIX
3. ELB
- 4.

If EVS disk capacity is not sufficient then you need to dettach disk from ECS and add new disk.

True

False

Which scaling action is not performed on Bandwidth scaling policy

1. replicate

API Gateway supports SDKs of:

Java  
Go  
Python  
C#  
JavaScript  
PHP  
C++  
C#  
Android  
Delphi

What are AI app in vision

Face Recognitor  
Image Recognitor  
Content Moderation  
Image search

Which component is not deleted automatically when DB instance is deleted

manual backup

You can change CPU or memory of a DB instance

True  
false

WHICH IS NOT THE PART OF AI BIG DATA

Openstack

How are regions divided

-Based on AZ  
-Geographic location and Network Latency  
-Cluster servers

Which are a part of HUAWEI CLOUD ecosystem

-Marketplace  
-Academy  
-Partners  
-Developers

The management console can be used without logging in.

-True  
-False

After creating ECS bandwidth cannot be changed/

-True

-False

When creating ECS you can use File injection function to initialize it.

-True

-False

Which is not an action of Bandwidth scaling policy:

-Reduce

-Double

-Set to

-Add

When creating image Cloudbase-init should be installed on OS to ensure that configuration of newly created ECSs from the image can be customized.

-True

-False

Server needs to be stopped before restoring EVS disk data using VBS backup.

-True

-False

Logging function of a bucket – where can log file be stored?

-Any bucket

-Enable logging

-The bucket on which logging is enabled

-All other buckets except the one which is logging

When compared with shared file systems what are the advantages of SFS:

-Robust reliability

-Seamless integration

-File sharing

-Easy operations, high cost- (wrong, should be low)

In Huawei Cloud VPN only IPsec is supported

-True

-False

What is the use of SA?

-Identification authentication

-Encryption

-Web crawlers

-Big data

Which is true about instance removal:

-If number of instances is greater than in AS group, some are removed

-When removed, the balance between AZs is not taken into account

-

-

Image creation fails if entered System disk capacity is less than System disk capacity of external image file.

-True

-False

Which are VPC access control functions?

Security group  
Network access list

- Fingerprint
- Password

Which EI service can implement large scale data analysis and query ?

- DLF
- DWS
- DIS
- GES

ECS lifecycle  
start Stop Restart Delete

Primary DB instance can replicate data to secondary DB Instances in :

Asynchronous  
Semi-synchronous

which of the following is not included in devcloud:

- A. Data backup
- B. Project Management
- C. Code Check
- D. Cloud buildup

Bucket A has been configured a policy not to allow any users to access it. Object B is inside Bucket A. Object B has an ACL that allows any users to access it. Therefore, object B can be access anonymously by any users.

1. Which of the following methods does AS use to expand resources?(multiple choice)

A. Dynamically expanding resources

B. Expanding resources as planned

C. Manually expanding resources

D. Automatically expanding resources

### Quiz-2

0 points possible (ungraded)

1.AZ Specifies a physical region where resources use independent power supplies and networks. AZs are physically isolated but interconnected through an internal network.

true ✓

false

1.AS supports the following instance removal policies:(multiple choices)

A.Oldest instances created based on the oldest configuration

B.Newest instances created based on the oldest configuration

C.Oldest instances

D.Newest instances

1.Which of the following policies does AS support?(multiple choices)

A.Alarm policies

B.Scheduled policies

C.Periodic policies

D.Monitoring policies

1.Private images can be classified into: (multiple choices)

A.System disk image

B.Data disk image

C.Full-ECS image

D.Snapshot

1.If the ECS uses a static IP address, configure DHCP for the ECS, allowing it to dynamically obtain an IP address.

true ✓

false

1. What image types does IMS support?(multiple choices)

A. Public image

B. Private image

C. Encrypted image

D. Shared image

1.VBD EVS disks support only basic SCSI read/write commands.

true ✓

false

1.EVS can be attached to:(multiple choices)

A.OBS

B.ECS

C.BMS

D.VPC

1.How many servers can a shared EVS disk be attached to at most? (single choice)

A.5

B.7

C.8

D.16 ✓

2.Which of the followings are EVS disk types?(multiple choices)

A.Ultra-high I/O

B.High I/O

C.Common I/O

D.Optimized I/O

1.HUAWEI CLOUD provides Cloud Server Backup Service (CSBS) and Volume Backup Service (VBS) to protect your data against:(multiple choices)

A.viruses

B.unintentional deletions

C.software faults

D. hardware faults

1.OBS is relatively inexpensive, reducing customers' costs.

true ✓

false

1.VBS provides the data backup function for EVS disks. The created data backups can be used to create EVS disks.

true ✓

false

1.Object Storage Service (OBS) is a stable, secure, efficient, and easy-to-use cloud storage service.

true ✓

false

2. The Advantages of Product OBS are:(multiple choices)

A. Stable

B. Efficient

C. Secure

D. Easy to use

1.OBS supports fine-grained permission control for buckets and objects through bucket policies.

true ✓

false

1.Users can collect OBS resource operation records through CTS service to facilitate future query, audit and backtracking.

A. True ✓

B. False

1. Advantages of SFS include: (multiple choices)

A. File sharing

B. Elastic scalability

C. Superior performance and reliability

D. Durable

1. CIFS is a protocol used for network file access.

true ✓

false

2. A file system provides users with shared file storage service through NFS or CIFS.

true ✓

false

1. Which of the following are the application scenarios of SFS? (multiple choices)

A. Media processing

B. Log management

C. Content management and web directories

D. High-performance computing (HPC)

1. Advantages of VPC are: (multiple choices)

A. Secure and Reliable

B. Flexible Configuration

C. High-Speed Access

D. Interconnection

1. A VPC provides an isolated virtual network for ECSs.

true ✓

false

1. Which of the Following Functions Are Provided by HUAWEI CLOUD VPC? (multiple choices)

Customizing CIDR blocks

Customizing access control policies

Accessing the Internet using EIPs

Connecting a local data center using a VPN or Direct Connect connection

2.The related service includes: (multiple choices)

A. ECS

B. ELB

C. Cloud Eye

D. Cloud Trace Service

1.Advantages of ELB include: (multiple choices)

A. High availability

B. High flexibility

C. High performance

D. High I/O speed

2.Basic Operations include:(multiple choices)

A. Create, delete, or query load balancers.

B. Add, modify, or delete listeners.

C. Add or remove backend servers.

D. Create, modify, or delete certificates.

1.Which of the following load balancing algorithms are provided by ELB? (multiple choices)

A. Weighted round robin

B. Weighted least connections

C. Source IP hash

D. Encryption algorithm

2.Which of the following protocols are supported by ELB? (multiple choices)

A. TCP

B. UDP

C. HTTP

D. HTTPS

1.DC does not support BGP dynamic routing.

true

1.What billing modes does VPN support?(multiple choices)

A. pay by bandwidth

B. pay by network traffic

C. Pay by year/month

D. Pay per use

1.Current VPN connection supports IPsec VPN protocol.

true ✓

false

1. With data security as its core, HUAWEI CLOUD builds a series of security services to meet the particular needs.security services include: (multiple choices)

A. Data Security

B. Host Security

C. Application Security

D. Network Security

2. Data Security includes:(multiple choices)

A. DEW

B. HSS

C. CGS

D. DBSS

1.You can use Cloud Eye to:(multiple choices)

A.monitor the utilization of service resources

B.track the running status of cloud services

C.configure alarm rules and notifications

D.respond to resource changes

1. Which of the following security services can be used to protect websites? (Multiple choices)

A.WAF

B.VSS

C.SCM

D.Anti-DDoS

2.Cloud Eye Advantages include:(multiple choices)

A. Automatic provisioning

B.Real-time and reliable monitoring

C.Visualized monitoring

D. Multiple notification methods

1. Server Monitoring includes:(multiple choices)

A. Basic Monitoring

B. OS Monitoring

C. CPU Monitoring

D. Disk Monitoring

1. Advantages of Relational Database Service include:(multiple choices)

A. Instant Availability

B. High Reliability

C. High Security

D. Elastic Scaling

Which aggregation methods does Cloud Eye support?(multiple choices)

A. Max

B. Min

C. Avg

D. Sum

1. The Key Features of RDS include:(multiple choices)

A. High Availability

B. Backup and Restoration

C. DB Instance Monitoring

D. High security

1. You can reboot a DB instance only when its status is Available.

true ✓

false

1. The minimum management unit of RDS is an instance.

Yeah. Wrong

2. ECS refers to the Auto Scaling (AS) service.

Yeah. Wrong

3. What are the key features of IAM?

A. Centralized control of users and security credentials

B. Centralized user access control

C. User group-based rights

D. Huawei customer service agent maintenance

4. The VPC subnet segment can be modified after being created.

Yeah. Wrong

5. VBS can create backups for EVS disks and use the backups to roll back EVS disks, ensuring user data accuracy and security to the maximum extent.

Yeah. Wrong

6. Which of the following statements about KMS is incorrect?

A. Management cloud platform and tenant key

B. HSM (hardware security module)

C. Multi-layer key protection technology

D. Support for application combination

7. Which of the following does not exist in the listener creation configuration?

A. Load balancer protocol/port

B. VPC

C. HTTPS certificate

D. Load mode

8. On the Dashboard page, you can add or delete monitoring icons of concerned instances. Supports multi-indicator comparison so that users can view the

Yeah. Wrong

9. Relational Database Service (RDS) users can modify database configurations to achieve optimal performance.

Yeah. Wrong

10. The size of the exported image is not limited.

Yeah. Wrong

11. The AS service can only dynamically add or reduce server resources based on the specified time period.

Yeah. Wrong

12. Which of the following statements about SFS is correct?

A. A file system can be mounted to an ECS and can belong to different VPCs.

B. Parameters cannot be modified for the file system that is successfully created.

C. The file system can access different AZs in the same VPC.

D. The performance of the SFS file system improves with the increase of capacity.

13. Which of the following images is a standard image provided by the public cloud platform and is visible to all users?

A. Public image

B. Private images

C. Shared image

D. Market image

14. The GPU is applicable to graphics rendering and engineering drawing in virtualization environments and desktop cloud scenarios.

Yeah. Wrong

15. What are the types of AS policies?

A. Scheduled policy

B. Periodic policy

C. Alarm policy

D. Random policy

**16. Which of the following scenarios are involved in image replication?**

- A. Copying an unencrypted image to another unencrypted image
- B. Replicating an unencrypted image as an encrypted image
- C. Replicating an encrypted image as an encrypted image
- D. Replicate an encrypted image to an unencrypted one.

**17. Allows users to set read-only permissions for SFS.**

Yeah. Wrong

**18. Which of the following load balancing modes are not supported by listeners?**

- A. Maximum number of links
- B. Polling
- C. Set weights.
- D. Minimum connection

**19. Which of the following methods can be used to set the access permission for anonymous users of OBS objects?**

- A. Set an ACL for the OBS bucket.
- B. Set the ACL for OBS objects.
- C. Set a policy for OBS objects.
- D. Set a policy for the OBS bucket.

**20. OBS supports batch upload.**

Yeah. Wrong

**21. What Are the Steps for Creating a Windows Image Using an ECS?**

- A. Configure the Windows server.
- B. Install Cloudbase-Init.
- C. Creating a Windows private image
- D. View and clear network rule files.

**22. You must stop the ECS before using it to create an image.**

Yeah. Wrong

**23. Which of the following is not a major application scenario of VPC?**

- A. VMs access each other.
- B. Desktop cloud access to Huawei Vmall
- C. The VM accesses the external network.
- D. VPN access to VMs

**24. To implement dynamic resource expansion, which of the following policies is selected when you create an AS policy?**

- A. Scheduled policy
- B. Periodic policy
- C. Alarm policy
- D. Random policy

**25. Which of the following parameters is used to automatically obtain an IP address during VPC creation?**

- A. DHCP
- B. Network segment
- C. Partitioning
- D. Gateway

**26. Which of the following is not the application scenario of Cloud Eye?**

- A. Daily resource management
- B. Issue notification
- C. Capacity adjustment
- D. Operation audit

**27. Which of the following is not a capability of DevCloud?**

- A. Project management
- B. Code check
- C. Compile and build
- D. Data backup

**28. Cross-VPC access to a file system is supported.**

Yeah. Wrong

**29. What Are the ECS Login Authentication Modes?**

- A. Password
- B. Password
- C. Fingerprint
- D. Key pair

**30. Huawei provides developers with functional development, which will help developers integrate the functions developed by Huawei with their upper-layer applications to build differentiated and innovative solutions.**

Yeah. Wrong

**31. Which of the following are RDS functions?**

- A. Create a database cluster.
- B. Expand the disk capacity.
- C. Adding a read replica
- D. Creating or restoring a snapshot
- E. Restore the backup to a specified time point.

**32. Which of the following functions are provided by OBS Console?**

- A. Static website hosting
- B. Multi-version control
- C. Cross-domain resource sharing
- D. Mounting external buckets

**33. Attach the EVS disk to an ECS so that the disk can be used directly.**

Yeah. Wrong

**34. Which of the following statements about VBS are correct?**

- A. After an EVS disk is deleted, its backup data is also deleted.
- B. After an EVS disk is deleted, you can use the backup to restore the EVS disk.
- C. After an EVS disk is deleted, you can still use the backup to create the EVS disk.
- D. After an EVS disk is deleted, its backup data will not be deleted.

**35. How Can I Add Instances to an AS Group?**

- A. Scaling action
- B. Manually add instances.
- C. Change the number of expected instances.
- D. AS configuration

**36. Alarm notification is the action taken when an alarm is triggered. Users can set or disable alarm notification when creating or modifying an alarm.**

Yeah. Wrong

**From which aspects does situational awareness analyze security posture?**

- A. Global perspective
- B. User perspective
- C. Management perspective
- D. Attacker perspective

38. After an application is created, you can change the application by replacing the image of the application.

Yeah. Wrong

39. ECSs are billed in yearly/monthly or pay-per-use mode.

Yeah. Wrong

40. A policy is configured for OBS bucket A to prevent any user from accessing objects in the bucket. Bucket A contains object B, which is configured with the ACL permission to allow anonymous users to access object B. In this way, users can access object B anonymously.

Yeah. Wrong

41. Which of the following are the main application scenarios of SFS?

- A. Media processing
- B. Log management
- C. Content management and home directory
- D. High-performance computing

42. IMS provides flexible self-service and comprehensive image capabilities. Users can create private images and use images to create ECSs in batches or replicate ECSs in batches.

Yeah. Wrong

43. When IPSec VPN is used for communication, the encryption and decryption check is performed on the firewalls at both ends.

Yeah. Wrong

44. VBS does not support batch backup of EVS disks.

Yeah. Wrong

45. Identity and Access Management (IAM)

Yeah. Wrong

46. To enable the log management function of an OBS bucket, which of the following permissions of the target OBS bucket must be granted to the log delivery user group?

- A. Read permission
- B. Write permission
- C. ACL permission
- D. Modify the ACL permission.

47. Which of the following is the image type converted from an ECS?

- A. Public image
- B. Private images
- C. Shared image
- D. Market image

48. What are the concepts of VPC?

- A. Subnet
- B. EIP
- C. Security group
- D. VPN

1. After an ECS is created, the bandwidth used by the ECS cannot be changed.

Yeah. Wrong

2. Which of the following operations is charged?

- A. Create an EIP.
- B. Create a subnet.
- C. Create a VPC.
- D. Create a security group.

3. Which of the following does not exist in the listener creation configuration?

- A. Load balancer protocol/port
- B. VPC
- C. HTTPS certificate
- D. Load mode

4. Which of the following is not the target of the cloud computing security service?

- A. User security
- B. Cloud platform security
- C. Data security
- D. Service security

5. Which of the following are the main application scenarios of SFS?

- A. Media processing
- B. Log management
- C. Content management and home directory
- D. High-performance computing

6. Which of the following EVS disks can be directly created on the EVS console?

- A. System disk
- B. Data disk
- C. Delta disk
- D. Mirror disk

The AS service must be used with Elastic Load Balance.

Yeah. Wrong

8. Which of the following statements about VBS are correct?

- A. VBS has no quota limit.
- B. If the capacity of an EVS disk is expanded after the disk is backed up, the disk capacity remains unchanged after the disk is restored using the backup data.
- C. If you back up an EVS disk and then expand its capacity, you cannot use the backup to restore the disk data. This is because the disk space will be restored to the original size after the restoration.
- D. After the capacity of an EVS disk is expanded, the disk space remains unchanged if the EVS disk is backed up and the backup is used to restore data.

9. What is the full name of ECS?

Elastic Cloud Server

10. What Are the Steps for Creating a Windows Image Using an ECS?

- A. Configure the Windows server.
- B. Install Cloudbase-Init.
- C. Creating a Windows private image
- D. View and clear network rule files.

11. Which type of image is converted from the elastic and server images?

- A. Public image
- B. Private images
- C. Shared image
- D. Market image

12. To enable the log management function of an OBS bucket, which of the following permissions of the target OBS bucket must be granted to the log delivery user group?

- A. Read permission
- B. Write permission
- C. ACL permission
- D. Modify the ACL permission.

13. VPCs can be connected to traditional data centers through private lines or VPNs to flexibly integrate resources.

Yeah. Wrong

14. If the capacity of the data disk attached to the ECS is insufficient, you must detach the disk and purchase a new one.

Yeah. Wrong

15. The size of the exported image is not limited.

Yeah. Wrong

16. Which of the following images is a standard image provided by the public cloud platform and is visible to all users?

- A. Public image
- B. Private images
- C. Shared image
- D. Market image

17. The VPC subnet segment can be modified after being created.

Yeah. Wrong

18. Which of the following components is not a component of the big data platform?

- A. MapReduce
- B. OpenStack
- C. HDFS
- D. Yarn

19. Attach the EVS disk to an ECS so that the disk can be used directly.

Yeah. Wrong

20. The AS service can only dynamically increase or decrease server resources based on a specified period.

Yeah. Wrong

21. SFS cannot be attached to an ECS running the Windows OS.

Yeah. Wrong

22. After an ECS is created, you can change its specifications if they do not meet your requirements.

Yeah. Wrong

23. What are the key features of IAM?

- A. Centralized control of users and security credentials
- B. Centralized user access control
- C. User group-based rights
- D. Huawei customer service agent maintenance

24. What are the important functions of IKE?

- A. Negotiation protocol parameters
- B. Protecting traffic security
- C. Key negotiation and management
- D. Peer identity authentication

25. The management console can be used without login.

Yeah. Wrong

26. Which of the following statements about VBS is incorrect?

A. VBS is based on the snapshot technology and supports online backup.

B. VBS supports full backup and incremental backup.

C. You do not need to stop the server when using a backup to restore an EVS disk.

D. When backing up EVS disks, you do not need to stop the server.

27. What are the alarm statuses of Cloud Eye?

A. Alarms B. Normal C. Insufficient data D. Close

28. What Data Does an ECS Use?

EVS disk

29. After the external network traffic reaches the load balancer, which of the following components is the first component to receive the traffic?

A. Firewall B. nginx C. LVS D. Health Check

30. What is the return value when a user-defined monitoring indicator is successfully uploaded using the Open API?

Return value: 201

31. Before creating an image using an ECS, ensure that the ECS has been stopped.

Yeah. Wrong

32. The cloud security service system consists of five parts: network security, data security, application security, security evaluation, and security support.

Yeah. Wrong

33. Database Service RDS Users Can Modify Database Configurations to Achieve Optimal Performance

Yeah. Wrong

34. Which of the following functions are supported by OBS Browser?

A. Static website hosting

B. Multi-version control

C. Cross-domain resource sharing

35. What are the application scenarios of VBS?

A. Hacker attacks or virus attacks

B. Data is deleted by mistake.

C. Data archiving and retention

D. The application program is faulty.

36. In the cloud computing environment, confidentiality, integrity, and availability are still the fundamental security requirements of users.

Yeah. Wrong

37. RDS can meet the ever-changing requirements of the gaming industry, shorten the R&D period, and reduce R&D costs.

Yeah. Wrong

38. Multiple EVS disks can be attached to an ECS.

Yeah. Wrong

39. Which of the following statements about SFS are correct?

A. A file system can be mounted to an ECS and can belong to different VPCs.

B. Parameters of created file systems cannot be modified.

C. The file system can access different AZs in the same VPC.

D. The performance of the SFS file system improves with the increase of capacity.

40. Which of the following are RDS functions?

A. Create a database cluster.

B. Expand the disk capacity.

C. Adding a read replica

D. Creating or restoring a snapshot

E. Restore the backup to a specified time point.

41. Which of the following load balancing modes is not supported by listeners?

A. Maximum number B. Polling C. Set weights D. Minimum connection

42. Create an OBS bucket, enable versioning for the bucket, upload object aaa for three times, disable versioning for the bucket, and upload object aaa for three times. After the preceding operations are complete, how many objects are displayed in the bucket basic information?

Quantity: 4

**43. Which of the following statements about Anti-DDoS traffic awareness is incorrect?**

A. Web vulnerability security detection

B. Configures and modifies anti-DDoS parameters for public IP addresses.

C. Provides protection for public IP addresses of ECSs and load balancing devices.

D. Monitors a single public IP address in the obstetrics department, including the current defense status, current defense configuration parameters, traffic since 24 hours ago, and one event within 24 hours.

**1. If two sites communicate with each other across the Internet, IPSec VPN can be deployed on the firewalls at both sites to protect the mutual access traffic between the intranets at the two sites.**

Yeah. Wrong

**2. Which of the following statements about hybrid cloud is incorrect?**

A. Unified management of public and private cloud resources

B. Service resources are migrated between the public cloud and private cloud.

C. Optimal resource allocation through hybrid cloud

D. Applications can only be deployed on the public cloud.

**3. Cloud computing is a model that enables users to obtain required resources from the shared pool of configurable resources anytime, anywhere, and on demand.**

Yeah. Wrong

4. All types of HUAWEI CLOUD products can be viewed on the management console.

Yeah. Wrong

5. Which of the following does not exist in the configuration for creating a listener?

- A. Load balancer protocol/port
- B. VPC
- C. HTTPS certificate
- D. Load mode

6. Which of the following is not a major function of WTP?

- A. Web site file protection
- B. Alarm information recording
- C. Protection details statistics
- D. SQL injection prevention

7. Which of the following are the main functions of HID?

- A. Brute force cracking detection
- B. Remote login notification
- C. Weak password detection
- D. Check the database process permission.
- E. Web page file detection

8. When the average value is selected as the aggregation mode, the peak values may be inconsistent when users switch the data range.

Yeah. Wrong

9. Which of the following statements is incorrect?

- A. Create a folder named br..ra/1 in the OBS bucket.
- B. OBS Console supports batch deletion of buckets.
- C. OBS Console supports batch deletion of objects.
- D. A user has created 101 buckets using OBS Console.

10. Which of the following functions are provided by the ECS service?

- A. Users can create and delete VMs, modify VM specifications, and start and shut down VMs.
- B. Users can add and uninstall extension NICs, add EIPs, and attach and detach disks.
- C. Users can view information about their ECSs on the management console.
- D. Users can set ECS alarm rules.

11. RDS meets the ever-changing requirements of the gaming industry, shortens the R&D period, and reduces R&D costs.

Yeah. Wrong

12. Which of the following services can work with EVS?

- A. Elastic Cloud Server
- B. Image Management Service (IMS)
- C. Volume Backup Service (VBS)
- D. Cloud monitoring service

13. Application security is an important part of the cloud security service. It ensures the security of elastic cloud computing servers and cloud computing applications running on them from the perspective of operating system and application security protection.

Yeah. Wrong

14. Which of the following statements about VBS is incorrect?

- A. VBS is based on the snapshot technology and supports online backup.
- B. VBS supports full backup and incremental backup.
- C. You do not need to stop the server when using a backup to restore an EVS disk.
- D. When backing up EVS disks, you do not need to stop the server.

15. Which of the following are the main application scenarios of SFS?

- A. Media processing
- B. Log management
- C. Content management and home directory
- D. High-performance computing

16. What are the application scenarios of VBS?

- A. Hacker attacks or virus attacks
- B. Data is deleted by mistake.
- C. Data archiving and retention
- D. The application program is faulty.

**21. An availability zone (AZ) is a collection of one or more physical data centers with independent cooling, fire extinguishing, moisture-proof, and electricity facilities. Within an AZ, computing, network, storage, and other resources are logically divided into multiple clusters.**

Yeah. Wrong

**22. Which type of image is converted from an ECS?**

- A. Public image
- B. Private images
- C. Shared image
- D. Market image

**23. Which of the following operations can be performed by a shared image provider?**

- A. Sharing a specified image
- B. Delete the shared image.
- C. Add a tenant to whom an image is shared.
- D. Delete the tenant who shares the image.

**24. Which of the following statements about the ELB function cannot be implemented?**

- A. Eliminate single points of failure.
- B. Sharing service node pressure
- C. Check the health status of service nodes.
- D. Layer 2 and Layer 3 data forwarding

**25. When enabling Direct Connect, what is the port type if the port type is 10GE?**

Optical port

**26. How long does it take to apply for an ECS?**

A few minutes.

**27. OBS supports batch upload.**

Yeah. Wrong

**28. What are the types of EVS disks?**

- A. More than I/O
- B. High I/O
- C. Common I/O
- D. Optimized I/O

**29. The VPC subnet segment can be modified after being created.**

Yeah. Wrong

**30. Data security ensures confidentiality and integrity of user data applications and storage in the cloud computing environment.**

Yeah. Wrong

**31. Before creating an image using an ECS, ensure that the ECS has been stopped.**

Yeah. Wrong

**32. Users cannot deploy service applications on ECSs as if they were using traditional servers.**

Yeah. Wrong

**33. Which of the following is not a basic concept of ELB?**

- A. Firewall
- B. Load balancer
- C. Listener
- D. Instance (VM or application container)

**34. Which of the following is not the main application scenario of KMS?**

- A. Data transmission encryption
- B. Personal data encryption
- C. Core service data encryption
- D. Key information asset encryption

**35. Which of the following statements about VBS are correct?**

- A. After an EVS disk is deleted, its backup data is also deleted.
- B. After an EVS disk is deleted, it can be restored using a backup.
- C. After an EVS disk is deleted, you can still use the backup to create the EVS disk.
- D. After an EVS disk is deleted, its backup data will not be deleted.

**36. Which of the following components is not included in the big data platform?**

- A. MapReduce
- B. OpenStack
- C. HDFS
- D. Yarn

41. VPCs can be connected to traditional data centers through private lines or VPNs to flexibly integrate resources.

Yeah. Wrong

42. After an ECS is created, its bandwidth cannot be modified once it is determined.

Yeah. Wrong

43. The web application firewall performs anomaly detection on HTTP requests to effectively prevent malicious network intrusion behaviors such as web page tampering, information leakage, and Trojan horse implantation.

Yeah. Wrong

44. What are the advantages of SFS over traditional file sharing storage?

A. File sharing

B. Seamless integration

C. The operation is simple but the cost is high.

D. High reliability

45. When multiple VMs are created, you can bind an EIP to multiple VMs to enable the VMs to access the Internet at the same time.

Yeah. Wrong

46. IMS provides flexible self-service and comprehensive image management capabilities. Users can create private images and use the images to create ECSs or load ECSs in batches.

Yeah. Wrong

47. RDS users can modify database configurations to achieve optimal performance.

Yeah. Wrong

48. A policy is configured for OBS bucket A to prevent any user from accessing objects in the bucket. Bucket A contains object B, which has an ACL that allows anonymous users to access. Then, users can access object B anonymously.

Yeah. Wrong

49. Alarm notification is the action taken when an alarm is triggered. Users can set or disable alarm notification when creating or modifying an alarm.

Yeah. Wrong

1. What are the components of an ECS?

A.CPU B. Memory C. Mirrorin;D. Elastic Volume Service

2. What operations do I need to perform to enable the created application to be accessed from the external network?

A. The number of nodes in the cluster exceeds 2.

B. The memory of each node exceeds 2 GB.

C. Release an application as a service when creating the application.

D. The Elastic Load Balance must be bound.

3. How Long Does It Take to Apply for an ECS?

A few minutes.

4. Which of the following protocols are important in the IPSec framework?

A.IP B.IKE C.AH D.ESP

5. What are the types of VPNs based on service usage?

A.Access VPN

B.Intranet VPN

C.Extranet VPN

D. Lay2 and Lay3 tunnel VPN

6. Attach the EVS disk to an ECS.

Yeah. Wrong

7. Which of the following statements about VBS is incorrect?

A. VBS is based on the snapshot technology and supports online backup.

B. VBS supports full backup and incremental backup.

C. You do not need to stop the server when using a backup to restore an EVS disk.

D. When backing up EVS disks, you do not need to stop the server.

8. EVS disks can be used only with ECSs.

Yeah. Wrong

9. When creating multiple VMs, you can bind one EIP to multiple VMs to enable them to access the Internet at the same time.

Yeah. Wrong

10. When creating an ECS, you can use the file injection function provided by the system to initialize the ECS.

Yeah. Wrong

11. Which of the following statements about Anti-DDoS traffic cleaning is incorrect?

A. Web vulnerability security detection

B. Configures and modifies anti-DDoS parameters for public IP addresses.

C. Provides protection for public IP addresses of ECSs and load balancing devices.

D. View the monitoring capability of a single public IP address.

12. Which of the following are the main functions of HID?

A. Brute force cracking detection

B. Remote login notification

C. Weak password detection

D. Check the database process permission.

E. Web page file detection

13. What computing services does Huawei public cloud provide?

- A. Autoscaling service
- B. Elastic Cloud Server
- C. Image Management Service (IMS)
- D. Elastic Volume Service

14. The web application firewall performs anomaly detection on HTTP requests to effectively prevent malicious network intrusion behaviors such as web page tampering, information leakage, and Trojan horse implantation.

Yeah. Wrong

15. Which of the following statements about the positioning of Huawei cloud services are correct?

Focus on the IaaS layer, enable the PaaS layer, and aggregate the SaaS layer.

16. To enable the log management function of an OBS bucket, which of the following permissions of the target OBS bucket must be granted to the log delivery user group?

- A. Read permission
- B. Write permission
- C. ACL permission
- D. Modify the ACL permission.

17. VBS can create backups for EVS disks and use the backups to roll back EVS disks, maximizing user data accuracy and security.

Yeah. Wrong

18. Which of the following statements about the ELB function cannot be implemented?

- A. Eliminate single points of failure.
- B. Sharing service node pressure
- C. Health check for service nodes
- D. Layer 2 and Layer 3 data forwarding

19. Cloud computing is a model that enables users to obtain required resources from the shared pool of configurable resources anytime, anywhere, and on demand.

Yeah. Wrong

20. Which of the following is not a major function of Anti-DDoS?

- A. DDoS attack protection
- B. Monitoring a single IP address
- C. Report on interception of a single IP address
- D. Periodically scan ECS vulnerabilities.

21. How Can I Add Instances to an AS Group?

- A. Scaling action
- B. Manually add instances.
- C. Modify the expected instance
- D. AS configuration

22. The SFS can control the read-only permission of users.

Yeah. Wrong

23. Which of the following statements about health check are correct?

- A. If no recovery is received within the timeout period, a failure is considered.
- B. Check whether the path protocol supports HTTPS.
- C. When the number of failures exceeds the health threshold, the service is unavailable.
- D. When the number of failures exceeds the unhealthy threshold, the service is unavailable.

The AS service must be used with Elastic Load Balance.

Yeah. Wrong

25. Which of the following service resource metrics can be monitored by Cloud Eye?

- A. Virtual private cloud
- B. Elastic computing service
- C. Distributed cache service
- D. Elastic Load Balance

26. IPsec VPN is an encrypted tunnel calculation. It uses encrypted security services to establish confidential and secure communication tunnels between different networks. Which of the following is not the feature that ensures packet transmission on the public network?

- A. Timelines
- B. Integrity
- C. Authenti
- D. Confidentiality

27. How Can I Monitor ECSs?

- A. Cloud Container Engine
- B. Cloud Eye
- C. Elastic scaling
- D. Virtual private cloud

28. Which of the following aggregation modes is supported by instance monitoring in Cloud Eye?

- A. Maximum
- B. Square dif
- C. Standard
- D. Average

29. What is the maximum number of alarm rules that can be configured?

1000 records

30. Which of the following load balancing modes are not supported by listeners?

- A. Maximum
- B. Polling
- C. Set weight
- D. Minimum connection

31. Which of the following is not a major function of SIS?

- A. Security level assessment
- B. Active and passive security concepts
- C. Security configuration evaluation
- D. Security intelligence collection

32. What are the types of AS policies that can be configured for AS?

3 types

33. VPCs can be interconnected with traditional data centers through private lines or VPNs to flexibly integrate resources.

Yeah. Wrong

34. Which of the following services can be used together with RDS to ensure network security isolation between RDS instances and other services?

- A. ECS
- B. VPC
- C. CES
- D. OBS

35. Which of the following shared file systems can be directly deleted?

- A. Creating
- B. Unavailable
- C. Deleting
- D. Deletion failed.

36. Which of the following statements about SFS are correct?

- A. A file system can be mounted to an ECS and can belong to different VPCs.
- B. Parameters of created file systems cannot be modified.
- C. The file system can access different AZs in the same VPC.
- D. The performance of the SFS file system improves with the increase of capacity.

37. Which of the following constitute the Huawei public cloud ecosystem?

- A. Application market
- B. Developer community
- C. Partners
- D. Huawei and service certification engineers

38. Which of the following image types are supported by IMS?

- A. Public image
- B. Private images
- C. Shared image
- D. Secret mirroring

39. Multiple EVS disks can be attached to an ECS.

Yeah. Wrong

40. The GPU is applicable to graphics rendering and engineering drawing in the virtualization environment and desktop cloud scenarios.

Yeah. Wrong

41. Which of the following functions are supported by OBS Browser?

- A. Static website hosting
- B. Multi-version control
- C. Cross-domain resource sharing
- D. Mounting external buckets

42. Network security, as an important part of cloud security services, implements network isolation to cope with network attacks and ensure network security.

Yeah. Wrong

43. Which of the following statements is incorrect?

- A. Create a file named br.ra/1 in the OBS bucket.
- B. OBS Console supports batch deletion of buckets.
- C. OBS Console supports batch deletion of objects.
- D. A user has created 101 buckets using OBS Console.

44. How many types of users can log in to Huawei Enterprise Cloud?

2 types

45. How Many EVS Disks Can Be Attached to an ECS?

10 PCS

46. When an EVS disk is detached from an ECS, the data on the EVS disk will be lost.

Yeah. Wrong

47. Which of the following parameters is used to automatically obtain an IP address during VPC creation?

A. DHCP B. Network s C. Partition D. Gateway

48. If the capacity of the data disk attached to the ECS is insufficient, you must detach the disk and purchase a new one.

Yeah. Wrong

49. Which of the following EVS disks can be directly created on the EVS console?

A. System d B. Data disk C. Delta dis D. Mirror disk

50. Which of the following is not an advantage of CES?

- A. Real-time
- B. Save money
- C. Multiple notification modes
- D. Monitoring third-party non-HUAWEI CLOUD services

51. Relational Database Service (RDS) users can modify database configurations to achieve optimal performance.

Yeah. Wrong

52. The AS service automatically adjusts service resources based on service requirements and policies.

Yeah. Wrong

53. What Can I Do If the Disk Capacity of an ECS Is Insufficient?

- A. Detaching a disk
- B. Reinstall the operating system.
- C. Expand the disk capacity.
- D. Change the operating system.
