View the GlobalProtect configuration screen capture.
What is the purpose of this configuration?

Internal Host Detection IPv4
IP Address 192.168.10.1
Hostname host.my.domain

Internal Host Detection
IP Address 91F
Hostname 14

A. It enables a client to perform a reverse DNS lookup on 192.168.10.1 to detect that it is an internal client.

B. It forces the firewall to perform a dynamic DNS update, which adds the internal gateway's hostname and IP address to the DNS server.

C. It configures the tunnel address of all internal clients to an IP address range starting at 192.168.10.1.

D. It forces an internal client to connect to an internal gateway at IP address 192.168.10.1.

Answer: D
