 - Episode Name: IoT Threats and Vulnerabilities
- =====

IoT Threats and Vulnerabilities

Objectives:

- OWASP Top 10 IoT Threats (2018)
 - <https://owasp.org/www-project-internet-of-things/>
- IoT Attack Surfaces
 - Ecosystem
 - Admin Portals and Web Interfaces
 - Physical Interfaces
 - Firmware
 - Network Traffic/Communication
 - Vendor and/or 3rd-Party APIs
 - Local Storage
 - Mobile App
- IoT Vulnerabilities
 - Many Oldies-but-goodies
 - Weak/No Encryption
 - Weak/No Passwords
 - No MFA/2FA
 - No lockout policy/capability
 - DoS
 - Theft
 - Lack of updates/patches/support
 - Physical console access
 - Insecure 3rd-Party components
 - JTAG(Joint Test Action Group) and side-channel
