- Topic Name: Recon Techniques - Scanning
- Episode Name: Network Scanning Types

Network Scanning Types

Objectives

- Identify and apply the 3 types of network scanning
 - State the objectives of network scanning
-
- What is network scanning?
 - The active process of utilizing networking technologies to gather information about a target network
 - What are the types of network scanning?
 - Network scanning aka HOST DISCOVERY (CEH definition)
 - Port/Service scanning
 - Vulnerability scanning
 - What are the objectives of network scanning?
 - Discover live network hosts
 - Discover OS
 - What are the objectives of Port/Service scanning?
 - Discover which port/services are running on target host(s)
 - Discover versioning info about services running on target host(s)
 - What are the objectives of Vulnerability scanning
 - Discover weaknesses in target hosts
 - These will be prioritized by probability of ease of exploit
