

## ITEMS

This is a list of every item Michael will have the chance to hold in the inventory. Some of them are previously placed in a location and Michael picks them up; some are given to him by some other characters; some are “built” by Michael combining other objects...

In fact, as you can see, some items feature several states throughout the game.

The list contains four columns:

- the **first column** contains the **image** of the item used in the game
- the **second column** contains the **name** of the item **in Spanish**
- the **third column** contains the **name** of the item **in English**
- the **fourth column** contains some **extra information** about the role of the item in the game, if we considered it useful.
