

## Module 4 Live Data Acquisition Lab

**Description:** In this lab, we will work to acquire and analyze data.

**Requirement:** You will need access to the Cybrary lab environment to complete this lab.

### Part 1

**Step 1:** Log into Cybrary

**Step 2:** Select Catalog at the top of the page

**Step 3:** In the search box on the left-side of the page, type **forensic**

**Step 4:** Locate the **Computer Forensics and Investigations** lab environment

**Step 5:** Click the Start Now button to launch the lab environment

**Step 6:** Click the “Understanding the Digital Forensics Profession and Investigations” lab.

**Step 7:** Click the Start button

**Step 8:** Power on all of the virtual machines

**Step 9:** Now we will work to acquire data

**Note:** In real-life, always be sure to use a write blocker, so you don't alter the data you are acquiring.

**Step 10:** Connect to PLABWIN810

**Step 11:** Double-click the ProDiscover Basic 64 shortcut icon on the desktop

**Step 12:** At the Launch Dialog box, click the Cancel button.

**Step 13:** Click **Action** at the top, then **Capture Image**

**Step 14:** A pop-up box will open

**Step 15:** Under the Source Drive area, select this option: **E:\[USB] 4.997 GB**

**Step 16:** Next, click the button with two arrows in the Destination area.

**Step 17:** Select the “Choose Local Path” option

**Step 18:** Navigate to C:\Work\Data files\Ch01 folder

**Step 19:** In the File name box, type: **InChp-prac**

**Step 20:** Click the Save button

**Step 21:** On the Capture Image pop-up box, type your name in the Technician Name box.

**Step 22:** Next, type this in the Image Number box: InChp-prac01

**Step 23:** Click the OK button

**Step 24:** You will see at the bottom-right of the screen that ProDiscover is acquiring the image of the target.

Note: This process may take 20-30 seconds to complete.

**Step 25:** Once complete, you may see a pop-up box that states the following. Just select OK.

“Image capture complete. Please check log file for any errors”

**Step 26:** Next, select File and then Exit to close ProDiscover

## **Part 2**

**Step 1:** Double-click the ProDiscover Basic 64 icon on the desktop

**Step 2:** At the Launch Dialog box, click the Cancel button.

**Step 3:** At the top, select File and then New Project

**Step 4:** A New project pop-up box opens

**Step 5:** Under the Project Number and the Project File Name, type this: **InChp01**

**Step 6:** Click OK

**Step 7:** On the left-side of the screen, click the + sign next to the Add option to expand it.

**Step 8:** Next, click Image File

**Step 9:** Click the **InChp-prac.eve**

**Step 10:** Click the Open button

**Step 11:** On the left-side, under the **Content View** section, click the + sign next to the Images option to expand it.

**Step 12:** Next, click the file path under the Images option.

**Step 13:** Next, click the + sign next to the file path

**Step 14:** You will then click on **All Files**.

**Step 15:** You will see a pop-up box warning you that listing all files may take some time to complete.

**Step 16:** Click the Yes button

**Step 17:** You will then see the results in the top window.

**Step 18:** Click the tracking.log file to view the contents in the bottom window.

**Step 19:** Next, click on the Search option in the bottom-left of the screen.

**Step 20:** A pop-up box will open. Make sure the Content Search tab is selected.

**Step 21:** Mark the checkbox next to **“Select all matches”**
