

Jenkins

Jenkins: Attach & Configure Jenkins Slave

START SLAVE AGENT

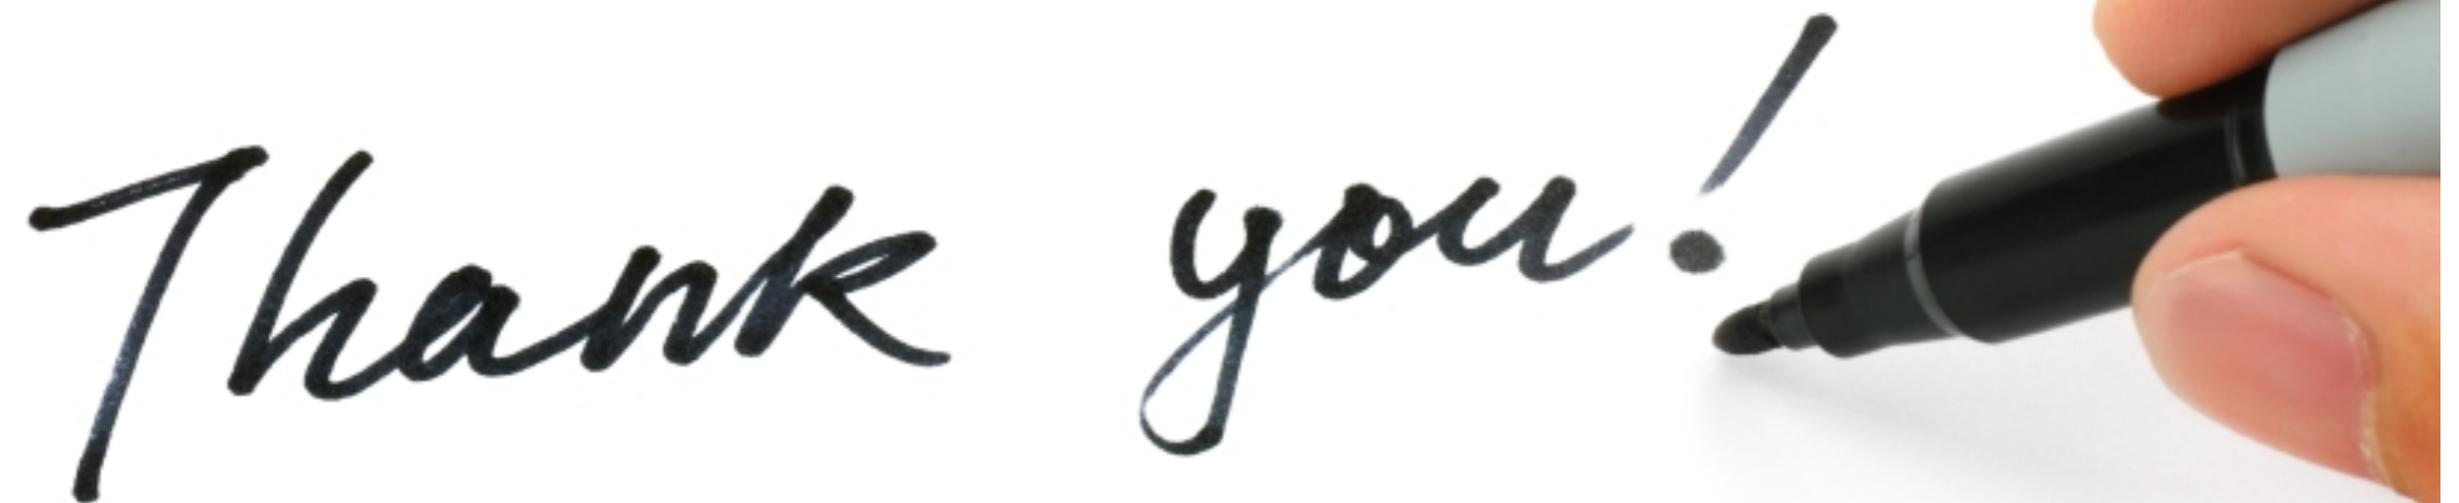

- Create the Slave Node.
- Master node will start the slave Agent on slave machine via SSH.
- Automatic SSH Login without password form master to slave is needed.
- Master Node will be running as a Specific User called **Jenkins** to start the slave agent.

JENKINS EXECUTOR

- Jenkins Executor basic block which allow Jenkins Job to Execute on Node.
- Executor is like a single Process which execute by master on slave machine to run build on slave.
- This number executors specify the maximum number of concurrent builds that Jenkins may perform on Slave Node.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the marker tip touching the paper. The background is plain white.
