

# DOCKER

---

*Run Commands in Running Container*

## *Docker : SSH Running Containers*

---

- Getting Inside the running Containers and execute Commands.
- `docker container exec -it` : Open Running Container interactivity
- The `docker exec` command runs a new command in a running container.

## *Docker : SSH Running Containers*

---

- Let's discuss & execute an Example Scenario.
- Start Nginx Docker Destro
- Run command and create Directory inside the Running Container
- Verify the New Directory
- Download new Linux Alpine Destro
- Use curl and view Facebook home page DOM in Alpine.

*Will see you in Next Lecture...*

---

*Thank you!*

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the marker tip touching the paper. The background is plain white.
