

# DOCKER

---

*Docker Network Command Management*

## *Docker : Docker Network Command Management*

---

- Show All networks

`docker network ls`

- Lists all the networks the Engine daemon knows about.

- We can filter the Networks

To Filter all bridge network

`docker network -f driver=bridge`

- To find all Network IDs and Drivers

`docker network ls --format "{{.ID}}: {{.Driver}}"`

## *Docker : Docker Network Command Management*

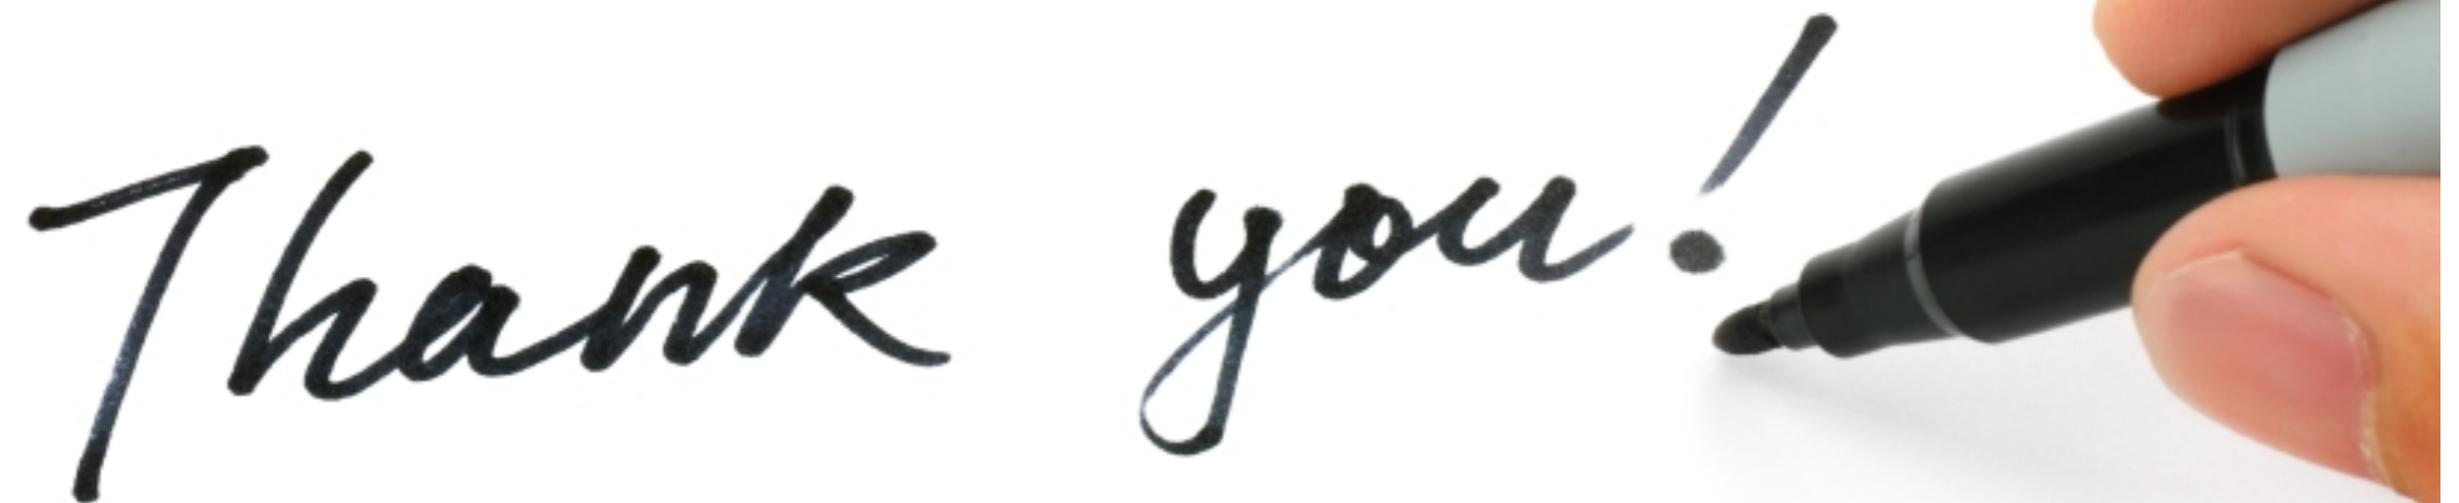

---

- Inspect any Network  
`docker network inspect`
- Returns information about one or more networks. By default, this command renders all results in a JSON object.

---

*Thank you!*

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the fingers gripping the marker. The text is written in a fluid, handwritten style.
