

DOCKER

Build Docker Image

Docker : Build Docker Images

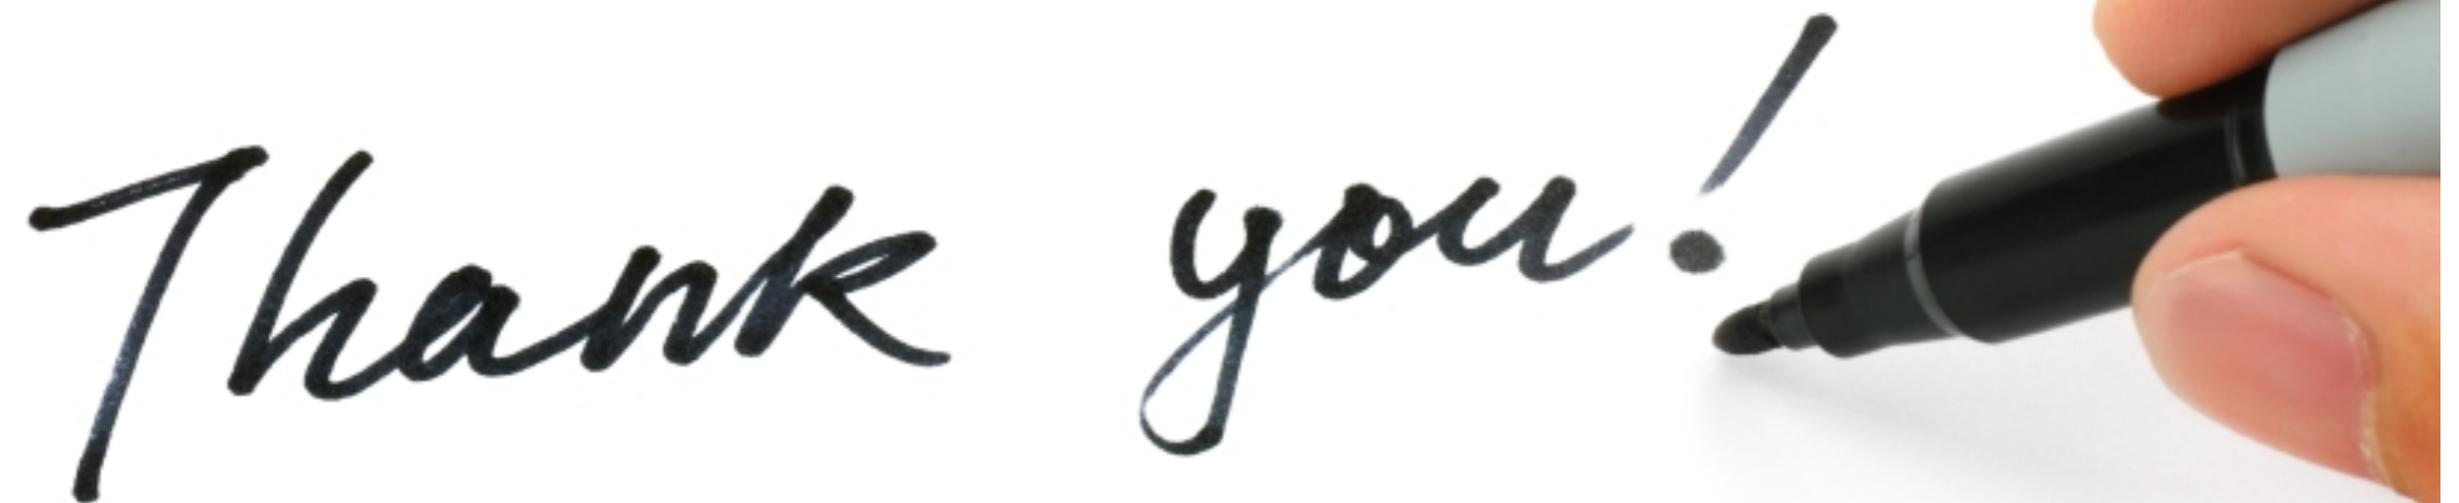

- Docker Image is Build from Docker File.
- Docker Build Syntax :
`docker build -t ImageName:TagName dir`
- **-t** – is to mention a tag to the image.
- **ImageName** – This is the name you want to give to your image.
- **TagName** – This is the tag you want to give to your image.
- **Dir** – The directory where the Docker File is present.

Docker : Build Docker Images

- Create Custom Nginx Image and Execute it.
- Tools we will use to Edit Docker File: [Visual Studio](#)
- Download Link of Visual Studio.
<https://visualstudio.microsoft.com/downloads/>
- Create Docker File.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the marker tip touching the surface. The background is plain white.
