

DOCKER

Docker Stack : Scale Service

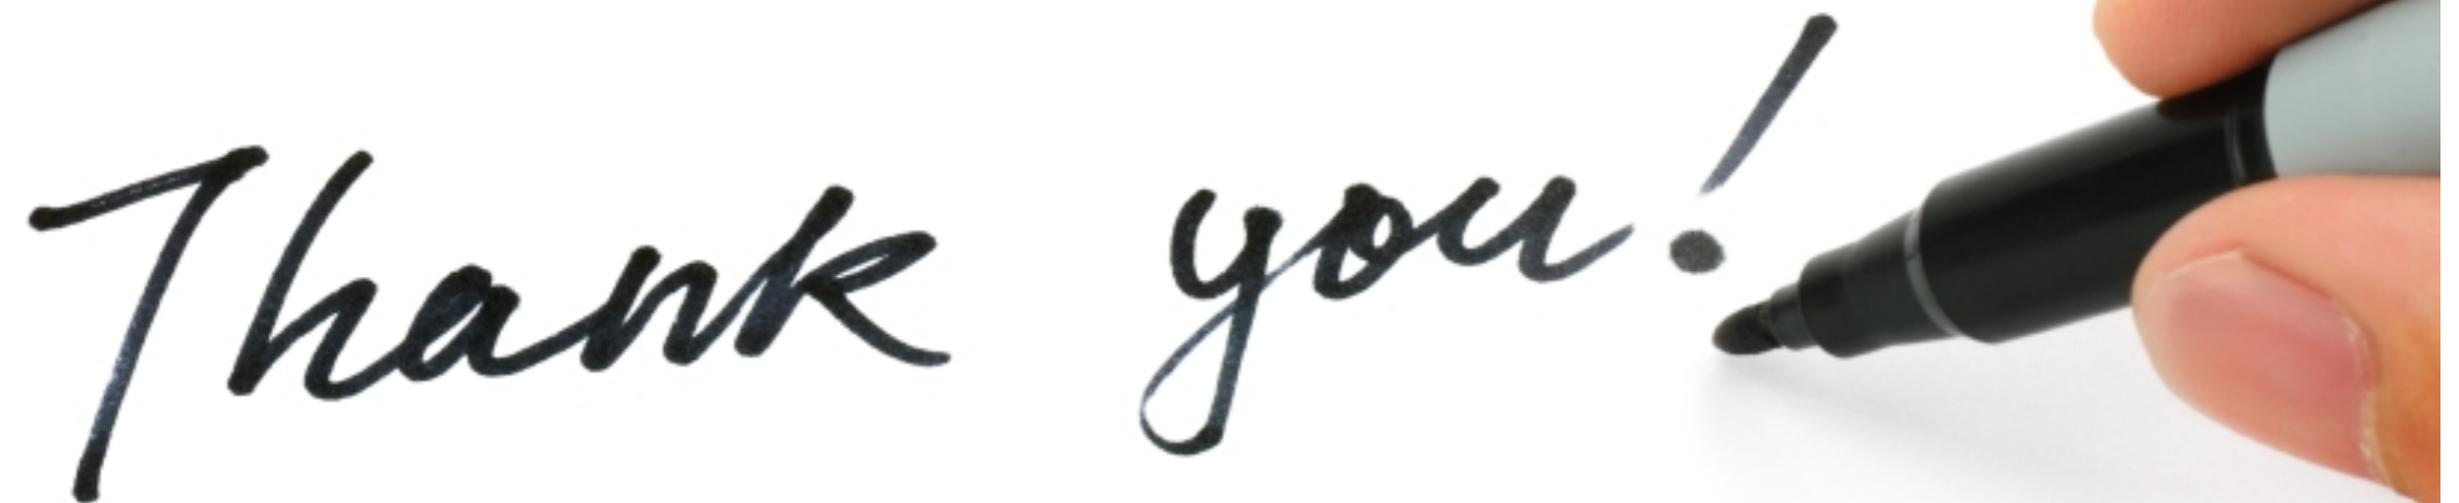

- Docker Stack : Scale Services
- User can scale Services by changing the YAML file and redeploy the YAML to reflect the changes.
- Add new Service in Stack. (Add Visualizer)

Docker : Docker Swarm

- Volumes: To access the host's socket file for Docker.
- Placement: To Ensure that this service only ever runs on a swarm manager -- never on a worker.
- Open the Visualiser to get the state of Tasks.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, writing the words 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the fingers gripping the marker. The text is written in a fluid, handwritten style.
