

TASKS TO COMPLETE

Windows Software To-do list #6

- Send command to CMD.
 - Use Process class.

If the given command doesn't contains any of the predefined keywords excute command via CMD.

Steps to do:

1. Create a new process that will use cmd.exe
2. Give command as argument to cmd.exe
3. Make sure new process won't create a windows by using CreateNoWindow property of Process class.

If you are new to this concept learn more about Process class and Process start operations before keeping continue.
