25 GDB Text User Interface

- [TUI Overview](#): TUI overview
- [TUI Keys](#): TUI key bindings
- [TUI Single Key Mode](#): TUI single key mode
- [TUI Commands](#): TUI-specific commands
- [TUI Configuration](#): TUI configuration variables

The GDB Text User Interface (TUI) is a terminal interface which uses the curses library. It is supported only on platforms where a suitable version of the curses library is installed.

The TUI mode is enabled by default when you invoke GDB as 'gdb -tui'. You can see the [TUI Bindings](#).
