

Practical Pentesting Methodology

Penetration testing methodology refers to the specific course of action taken by a pentest provider to conduct the pentest of a target website or network. There are multiple penetration testing methodologies that can be put to use depending on the category of the target business, the goal of the pentest, and its scope

Pentesting Methodology

STEP 1:
Network enumeration and
mapping

STEP 5:
Exploit launching

STEP 2:
Reconnaissance

STEP 6:
Further exploitation

STEP 3:
Network sniffing

STEP 7:
Phishing/social engineering

STEP 4:
Vulnerability scanning
