Go to several download forums and click register. Submit an username wich looks like you are a company, for example "EcoSolutions".

After you did that, you can start making threads. Make a lot of threads with downloads, use everything you can even think about.. Don't make your thread

very low quality but don't spend to much time on it as well. 1-2 Minutes a thread will be fine. You can use this method for every download forum.

Java drive by spreading Chat rooms

Go to <http://www.000webhost.com> and make yourself an account. You can use every webhost you want, but 000webhost is free and advanced. You can find a tutorial about

how to setup your java drive by here:

<http://www.hackforums.net/showthread.php?tid=280140>. After you set-up your JDB, go to

<http://www.dot.tk>. Make your domain a girls name like blahlive.tk

for your JDB. A few examples of spreading places are

<http://www.tinychat.com>, <http://www.chat-avenue.com>, <http://www.habbo.com> and so on. Start spreading your JDB by typing things like this: AgeFemale-USA About to get naked on webcam, watch me on <http://www.blahlive.tk> <3.

Torrent spreading (0-a LOT Depending on your seeders and amount of torrents spreading.)

First off, download uTorrent from here:

<http://www.utorrent.com/intl/nl/downloads>. Install it and create your own torrent file. Register to a torrent site like <http://www.thepiratebay.se>.

There are alot of others you can find with google with ease. If you have a rat with a seeding function, i highly recommend you to use that on your bots to spread your torrent.

Seeders will get you higher in the list of people searching for downloads they want.

New methods, added 12 April, 2012.

Targeting spreading (Not alot of installs, but valuable installs | You need a JDB.)

First off, you need to get it mind who you want to infect. You will need somewhat contact

fuckyouamnesiahazepremiumguidepublicshit
details from your slave to do this. You will need some
Human Manipulation skills for this.
First off, make a female account on the social network
your slave is using.
Follow/add/whatever your slave on the desired social
network. Pretend to be a girl. This
is the point your human manipulation skills will increase
your change of success. Keep in mind, you are a girl, so
be girly. Tell them you are willing to have some fun over
webcam, but your webcam isn't working on
msn/skype/whatever you are using. Invite
them to your livestream/tinychat/whatever your JDB is
made for and if you have a FUD
java drive by and server, there is a high change your
slave will fall for it.
Youtube spreading (Up to 2000 installs a month)

First off, you will have to register a channel at
<http://www.youtube.com>. This would take up to
5 minutes. Make your channel looking somewhat nice, so it
looks like you are actually
giving out working programs. After that, download youtube
downloader, wich can be
found here:
http://download.cnet.com/YouTube-Downloa...00-2071_4-10647340.html. After that, start searching for different
programs on youtube. Think about
key generators, game cracks, free FUD crypters/keyloggers
and everything wich can be
executed. After downloading 20-50 video's, make a
description you are going to put in
every video. It would be like: Download this awesome
program here:
<http://www.uploadsite.com/installer.exe>. After that, open
10 uploading tabs. Start uploading 10
of your video's, put in some tags and after that upload
the other video's as well. If your
server is FUD, you will start receiving installs very
fast.
